WATTERS & SONS

Seed Merchants and Nurserymen

251-253 SWANSTON ST., MELBOURNE

Established 1866

EXPERIENCED GARDENERS KNOW

that seeds of best quality are absolutely essential to success in gardening. High-class seeds require no more water, manure and attention to produce their best than those of inferior quality, while the difference in returns repays many times the small extra cost in obtaining seeds of the highest quality. **THAT THE BEST CROPS** are obtained from **Watters Selected Seeds** is proved by the fact that for more than 50 years they have been a **Standard** among the **Best Gardeners** of Australasia for undoubted purity and excellence, and to those who may favour us with an order for the first time, we can assure them that they cannot possibly procure higher-class seeds anywhere at any price.

Watters Selected Seeds, which we put up in our stamped packets bearing a red seal, are now distributed to almost every town and village in the country, and, wherever grown, are acknowledged to be of superior quality and of the highest type of their respective varieties.

WATTERS & SONS, Seed Merchants, 251-253 Swanston St., MELBOURNE

ESTABLISHED 1866

MONTHLY CALENDAR FOR THE VEGETABLE GARDEN

Seeds are named in this Calendar which may be sown in each month from January to December under normal circumstances. The state of the weather may prevent sowing dates from being strictly adhered to, but, as regards this, our friends and patrons will no doubt use their own discretion.

L. Signifies sow largely.

M. Make a medium sowing.

F. Sow a few.

JANUARY.

L. French Beans	M. Carrot	L. Onion
F. Beet	L. Cauliflower	L. Peas

NON-WARRANTY

Messrs. Watters and Sons wish it to be distinctly understood that, although they continue to take all possible means to supply only New, Genuine, and Unadulterated Seeds, they still give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any of the seeds sent out, and will not be in any way responsible for the crop. Every order received for articles named in this Catalogue will be executed on these conditions only.

SOME FLORAL GEMS

That should be in every Garden

Following our practice of many years to give our patrons only the very best in Flower Seeds, we have again this season gone to considerable expense to procure the pick of American and European Floral Creations. The various strains of Choice Flower Seeds, which we herewith offer, are all from growers of repute, and are thoroughly reliable. The strain of Mammoth Emperor Zinnias we specially recommend, as they are from a grower who has for many years produced the finest Zinnias in the world.

Beautiful New Long Spurred AQUILEGIAS

LONG-SPURRED, SCARLET AND GREEN.

The Exceedingly Handsome and Distinct Mexican Columbine.

A long-spurred variety, having unique colouring. The flowers are scarlet, tipped with green, and are very freely produced. 1/6 per packet.

GIANT SULPHUR YELLOW, WITH LILAC SPURS.

A sport of the well-known Aquilegia chrysantha, forming dense bushes of 2½ ft. in height, with strong upright stems bearing freely above the fine foliage a multitude of large showy flowers of a lovely sulphur yellow colour, with long yellow or soft lilac spurs. 1/- per packet.

DOUBLE LONG-SPURRED, SCARLET AND GOLD.

Growing about 2½ ft. in height, this double form of the Californian Columbine produces large flowers of a glowing golden yellow, with shining red long spurs. The plants are of finely branching habit and decorated with a graceful foliage. 1/- per packet.

LONG-SPURRED ROSE QUEEN.

The most delicately coloured of all the Aquilegias. The strain produces various shades of rose and white, of the best long-spurred type. 1/- per packet.

THE TRUE ROCKY MOUNTAIN COLUMBINE. (Aquilegia Coerulea.)

Probably the most beautiful American native flower. Colour, clear blue and white. A beautiful garden plant. 1/- per packet.

Basket or Weeping Begonias

A weeping form of beautiful flowering Begonias in many colours that are adapted for hanging baskets. These are specially suited for hanging in greenhouses, conservatories, ferneries, etc., and are also very useful for large stone vases, etc., as they are very light and graceful in appearance. 2/- per packet.

Bird of Paradise Flower

This is a striking and attractive flower. The blossoms are of a rich golden yellow, about 2½ inches in diameter, produced in large trusses, the most striking feature being the long, incurving stamens and pistils, of a beautiful bright crimson colour. Seed should be soaked in warm water and planted in the open ground or started indoors in a light, sandy soil. A sunny situation is required, in dry and very warm soil. 1/- per packet.

Bouquet Grasses

The mixture contains many beautiful grasses of most graceful growth, blooming during the summer and autumn. If sprays are cut when freshly opened (before seed forms) and slowly dried in a cool place, they will lend a graceful, airy effect to bouquets of dried everlasting flowers. Small clumps sown here and there amongst flowering plants give a nice effect in the garden. 6d. per packet.

CALIFORNIA RECORD ASTERS

This strain of Asters is claimed to be the finest in the United States. It produces an enormous plant of great vigour, branching freely and bearing on long, graceful stems double blossoms of the most gigantic size, like immense Cactus Dahlias. It is an Aster that will astonish all who grow it. The flowers are very double and immaculate. For cutting for vases and bouquets, they rival the finest Chrysanthemums, the glorious blossoms lasting a long time. Each flower is as double and perfect as a Pæony, 5 to 6 inches in diameter, with centre filled with a charming whorl of petals after the true Comet style. All colours mixed. 1/6 per packet.

California Record Asters IN SEPARATE COLOURS.

To meet the requirements of those who wish to work out colour schemes in Asters, we have imported Record Asters in the following separate colours:—

YELLOW	BRILLIANT ROSE
ROSY LILAC	PEACH BLOSSOM
TERRA COTTA	CRIMSON
SALMON ROSE	DEEP LILAC
AZURE BLUE	DARK BLUE
WHITE	CREAM

Each, 1/6 per packet.

Christmas Rose FINEST VARIETIES MIXED.

An improved strain of the well-known English Christmas Rose. It blooms in the depth of winter, and produces a great number of its beautiful white and blush flowers over a long period. 1/- per packet.

Clove Scented Malmaison Carnations

Most people are familiar with the old Clove Scented Carnations that bloomed so sweetly in nearly every old garden. These new varieties are the same, only they bloom the first summer from spring sown seed. The flowers also present an array of finer colours, ranging from white, through different shades of pink to crimson, scarlet and maroon. All have that rich and beautiful fragrance so prized in the old Carnations. The habit is very dwarf and compact, and wonderfully free-flowering. 1/- packet.

DELPHINIUM

Blackmore & Langdons Exhibition

This firm specialises in this flower, and their strain is recognised as the finest in the world. For years they have won first prizes in all the leading European shows for their Delphiniums. We import the seed direct from them, and the mixture includes novelties such as Blue Princess, Ed. Bromet, and others which are listed by them, at from two to three guineas each. Gardeners may sow this seed and be confident that the resultant plants will prove something very much out of the ordinary. 2/6 per packet.

SOME FLORAL GEMS—Continued

Double Bedding Cinerarias

FINEST MIXED.

A double form of this showy bedding plant. The flowers, which come almost all true from seed, are quite double, after the style of a Double Marigold, and are produced in many brilliant colours. This strain makes a fine show if grown as pot plants. 1/6 per packet.

Double Hybrid Iceland Poppies

A splendid strain of Iceland Poppies that will produce 80 per cent. of beautiful double flowers. They are extremely graceful, the bright, large blossoms being borne on tall, wire-like stems well above a beautiful crown of fern-like foliage. The colours are exceedingly bright and novel—lemon yellow, orange, salmon, white, etc. They bloom all the season through. 1/- per packet.

Giant Tigred and Blotched Pentstemons

Blooms the first season from seed. Graceful spikes, about 2 feet long, covered with large Gloxinia-like flowers, often 2 inches across, in a great variety of colours from pink to scarlet and maroon, all beautifully blotched and veined with other tints. An unrivalled strain. 1/- per packet.

Giant Yellow Shasta Daisy

Lovers of perennial flowers will welcome this splendid Shasta Daisy. The colour, a rich yellow, will appeal to everyone. The plants grow two feet high and produce enormous flowers that are excellent for cutting. 6d. packet.

Golden Glory Climber

(*Thunbergia Gibsonii*)

A lovely trailing plant, with large showy flowers. It will trail over the ground, rocks or on trellis, forming a dense mat of foliage and flowers. It is very free flowering, and the colour of the flowers is the most brilliant orange that we know of. This is undoubtedly the finest climber for covering limited spaces that has ever been introduced. 1/6 per packet.

Maiden Hair Fern Bush

(*Thalictrum Adiantifolium*)

This is a small bush that should be in every garden. The foliage is highly ornamental, has the appearance of beautiful Maiden Hair Fern, and is splendid for mixing with cut flowers. Growing in the garden, this little shrub stands out distinctly from others. Highly recommended. 1/- per packet.

MAMMOTH EMPEROR ZINNIAS

This strain of Zinnias is so far ahead of any other that it is a class of its own. The Mammoth blooms frequently measure six inches across, while the colours include white, flesh, golden yellow, lilac, rose, scarlet, purple, crimson, sulphur and many art shades hitherto unknown in Zinnias. This Zinnia is a robust, free grower, furnishing an abundance of large, double blossoms during the entire summer and autumn. Each flower keeps perfect for six weeks before fading, and each plant is a great mass of bloom all the time, making a showing which is peculiar. Seed, 1/6 per packet.

Mammoth Emperor Zinnias

IN SEPARATE COLOURS.

We have pleasure in now offering this wonderful strain of Zinnias in the following separate colours:—

GOLDEN YELLOW	WHITE
FLESH COLOUR	SCARLET
CRIMSON	VIOLET
PURPLE	SALMON

Each, 1/6 per packet.

Pansy Boulogne Prize

This is the leading exhibition strain of Pansies in Europe, and it certainly is worthy of the fame it has attained. Large flowers of the finest colouring; stout, robust, bushy growth, withstanding the heat and producing fine large flowers. We tried this strain last season, and were very pleased with it. There were new and fantastic colours that we have never before seen among Pansies, all colours and shades being represented. 2/6 per packet.

Phlox Drummondii Gigantea

FINEST MIXED.

Flowers of great substance, beautiful form and uncommon size, while the colours are extraordinarily rich and varied, glowing crimson, dazzling scarlet, deep rose, soft pink, pale blush, maroon-black, lavender-purple, pure white, and numberless other shades, many with contrasting eyes, stripes or feathering. In habit these new Phlox are erect, and bear their velvety blossoms in great profusion, making them unrivalled for bedding. They are of dwarf, stout, branching habit, and the individual flowers are almost the size of a two shilling piece. Grandest of all Phlox. 1/- per packet.

Royal Bedding Pinks

A remarkable, distinct new Fringed Japanese Pink. The plants grow from 12 to 15 inches high, and produce large flowers 3 inches across, on stiff, upright stems. From a third to a half of the flower seems to consist of graceful fringes, turned and twisted in all directions, giving an appearance both pretty and unique. There is a wide colour range. These Royal Pinks afford desirable material for bouquets, and cannot be excelled for bedding or border purposes. 1/- packet.

Scarlet Syrian Flos Adonis

The seed of this plant is very slow in germinating, and sometimes takes several months to come through; but, when in flower, well repays any waiting for the blooms. It produces large, deep blood red flowers, surrounded by beautiful fern-like foliage. It is unique and is splendid for groups, bedding and cut flowers. 2/6 per packet.

Watters Novelty Mixture of

Spencer Sweet Peas

This season we have again imported the cream of the new varieties of Spencer Sweet Peas, and made them into mixture. This will enable Sweet Pea lovers to keep right up to date in their varieties at small cost. As the mixture contains about twenty-five varieties, in all colours, it should be specially attractive. 1/6 per packet.

West Australian Blue Lace Flower

This beautiful flower is a native of West Australia. It is of branching habit, and grows about 2 ft. high. Each branch ends in an umbel of light sky-blue flowers, which spread out in an umbrella-like fashion, crowning each shoot with a beautiful and delicate head of flowers. Each individual bloom in the umbel is carried on a thin and long tube, giving the flower-heads a delicate and dainty touch. The name, Lace Flower, is most appropriate, since the blooms resemble in their quaint and artistic arrangement the most delicate and dainty lace. This should be very popular as a cut flower. 1/- per packet.

Winter & Spring Flowering Stock

"RIVIERA MARKET" MIXED.

This strain comes direct from the south of France, the home of the finest Stocks. The seed, which has all been saved from pot-grown plants, will produce the highest percentage of double flowers it is possible to obtain. This strain blooms very quickly from seed, the plants being stout, branching and compact, with numerous flower spikes of very large size. The individual flowers are large, very double, and perfect in form. The mixture is made up of 15 choice varieties. 1/6 per packet.

Some Choice Flower Seedlings

IN RESPONSE TO NUMEROUS REQUESTS, WE HAVE GROWN THIS SEASON A NUMBER OF SPECIAL LINES OF FLOWER SEEDLINGS THAT SHOULD PLEASE THOSE GARDENERS WHO DESIRE SOMETHING MUCH BETTER THAN THE SORTS USUALLY GROWN. THEY ARE RAISED FROM THE FINEST QUALITY SEED, ARE STRONG AND HEALTHY, AND WE PACK THEM IN MOSS AND CARDBOARD BOXES TO ENSURE SAFE CARRIAGE.

ANTIRRHINUM, Art Shades Finest Mixed

A splendid mixture containing many new and choice colours. Planted early in the Autumn, these make a fine display through the winter. 1/6 dozen, post free.

CARNATION, New Clove Scented Mixed

This strain contains many new colours of the well-known and extremely popular Clove-scented Carnation. Seedlings will flower in a few months, and continue in bloom for a long time. 2/6 dozen, post free.

DELPHINIUM, Blackmore & Langdons Exhibition

We have raised a limited number of plants of this famous strain from seed lately received from this firm, and can recommend them to those who desire the finest class of Delphinium in existence. 5/- dozen, post free.

PRIMULA MALACOIDES

This variety is now extensively grown for winter blooming. The small lavender-pink flowers are borne in great profusion throughout the winter and early spring. 1/3 dozen, 7/6 100, posted.

BUTTERFLY VIOLAS

For winter and spring bedding, Violas have become extremely popular. Of the many fine sorts in cultivation, the Blue Butterfly is easily the best. Lovely lilac colour, with dark eye. 1/3 dozen, 7/6 100, posted.

PANSIES, Baths Selected Empress

Comprising the magnificent varieties specially selected for the Queen's gardens at Frogmore. This selection is more striking and rich in colours than any Pansies yet sent out. 2/6 dozen, 15/- 100, posted.

PANSY, Boulogne Prize

One of the finest exhibition collections from France. The strain produces a large percentage of those glorious rich brown shades that are so much admired and are unsurpassed for exhibition. 3/6 dozen, post free.

MAMMOTH BEAUTY STOCKS

Plants of this new strain are of dwarf growth and produce an extraordinary profusion of bloom. 1/3 dozen, 7/6 100, posted.

HYBRID ICELAND POPPIES

This strain contains many new colours and shades; the fragrant and elegant crushed satin-like flowers are produced in great profusion during the spring and early summer. 1/3 dozen, 7/6 100.

SWEET PEAS, Winter Flowering Novelty Mixture

All the newest and choicest Spencer Winter-flowering sorts in mixture. They will make a delightful show during winter and early spring. 1/6 dozen, 10/- 100, post free.

Special Garden Fertilisers

The importance of maintaining soil fertility by replacing the elements removed by plant life cannot be too fully emphasised. Each crop removes from the soil plant foods such as Nitrogen, Potash, and Phosphoric Acid, and, if these are not replaced regularly, the condition of the soil becomes so low that profitable crops cannot possibly be produced on it. It is now recognised that stable manure must be supplemented by commercial fertilizers in order to give the best results. We make a specialty of the best class of fertilisers, and to those requiring large quantities we shall be pleased to forward quotations by the ton. In the meantime we have pleasure in offering the most useful in quantities usually required for the average Vegetable and Flower Garden.

Watters Special Bone Fertilizer

Is the ideal home garden manure, as it contains only pure washed bones crushed to various sizes, and contains a large amount of fine meal. It has no objectionable odour, as is the case with other bone fertilizers, and will not burn the most tender garden subject. One application of this will last for twelve months. Your Carrots, Parsnips, Beet, Beans and other crops will give the best possible results if you use it, and it may be applied with equally good results to Pot Plants, Shrubs, Roses and all classes of Annuals.

Sold in 1/6 bags; 28 lbs., 6/6; 1 cwt., 22/6.

Your Lawns

Both Buffalo and other grasses will give wonderful results if dressed occasionally with Sulphate of Ammonia. This fertiliser supplies nitrogen in a readily available form, and for quick results on plants that absorb this nutriment in large quantities there is nothing better. Lawns that have become hard and are showing a brownish colour may be given a fresh lease of life by applying Sulphate of Ammonia, the effect of which is apparent in a couple of weeks. In the Vegetable Garden it is no less useful. Cabbage, Cauliflowers, Onions, Lettuce and similar crops give wonderful results if treated with it. May be applied either in liquid or dry.

SULPHATE OF AMMONIA 4d. lb.; 12 lbs., 3/6.

Directions for Using on Every Label

DON'T SOW GOOD SEEDS IN POOR SOIL. EXPERIENCED GARDENERS USE FERTILIZERS CONTINUOUSLY, SO SHOULD EVERYONE WHO WISHES TO GET THE BEST RESULTS. USE FERTILIZERS AND NOTE THE WONDERFUL IMPROVEMENT IN YOUR GARDEN.

Your Fruit Trees

Require potash in sufficient quantity to ensure a vigorous growth of branches, as well as heavy and continuous crops of finest quality fruit. Most soils are deficient in Potash, which is very essential, both to trees and Rose bushes that are not making the growth they should.

MURIATE OF POTASH 4d. lb.; 12 lbs., 3/6.

Your Roses, Hydrangeas, Bougainvilleas, &c.

Are often lacking in that rich colouring that distinguishes the well-grown specimen. This will be especially noticeable in soils that are deficient in iron. The great depth of colour that everyone appreciates in all flowers may be obtained by using

SULPHATE OF IRON 4d. lb.; 12 lbs., 3/6.

Another useful fertilizer that is popular with some gardeners is **NITRATE OF SODA**, a form of nitrogen that is good for forcing Salads and similar crops, as well as Annuals in the Flower Garden. 4d. lb.; 12 lbs., 3/6.

A POOR AND HUNGRY SOIL CANNOT PRODUCE GOOD CROPS, BECAUSE IT LACKS THE NUTRIMENT THAT ALL PLANTS MUST HAVE TO PRODUCE LUXURIANT GROWTH.

Specialties in Vegetable Seeds

Broad Bean—Watters Triumph

A most distinct and valuable variety, and the finest type of Broad Bean grown. It is the earliest in cultivation and a great bearer. On one plant we have counted thirty-seven pods of from six to nine inches in length, each pod containing from five to eight Beans of a most delicious flavour. 1/- per pound; 6d. per packet.

Climbing Giant White Cluster Bean

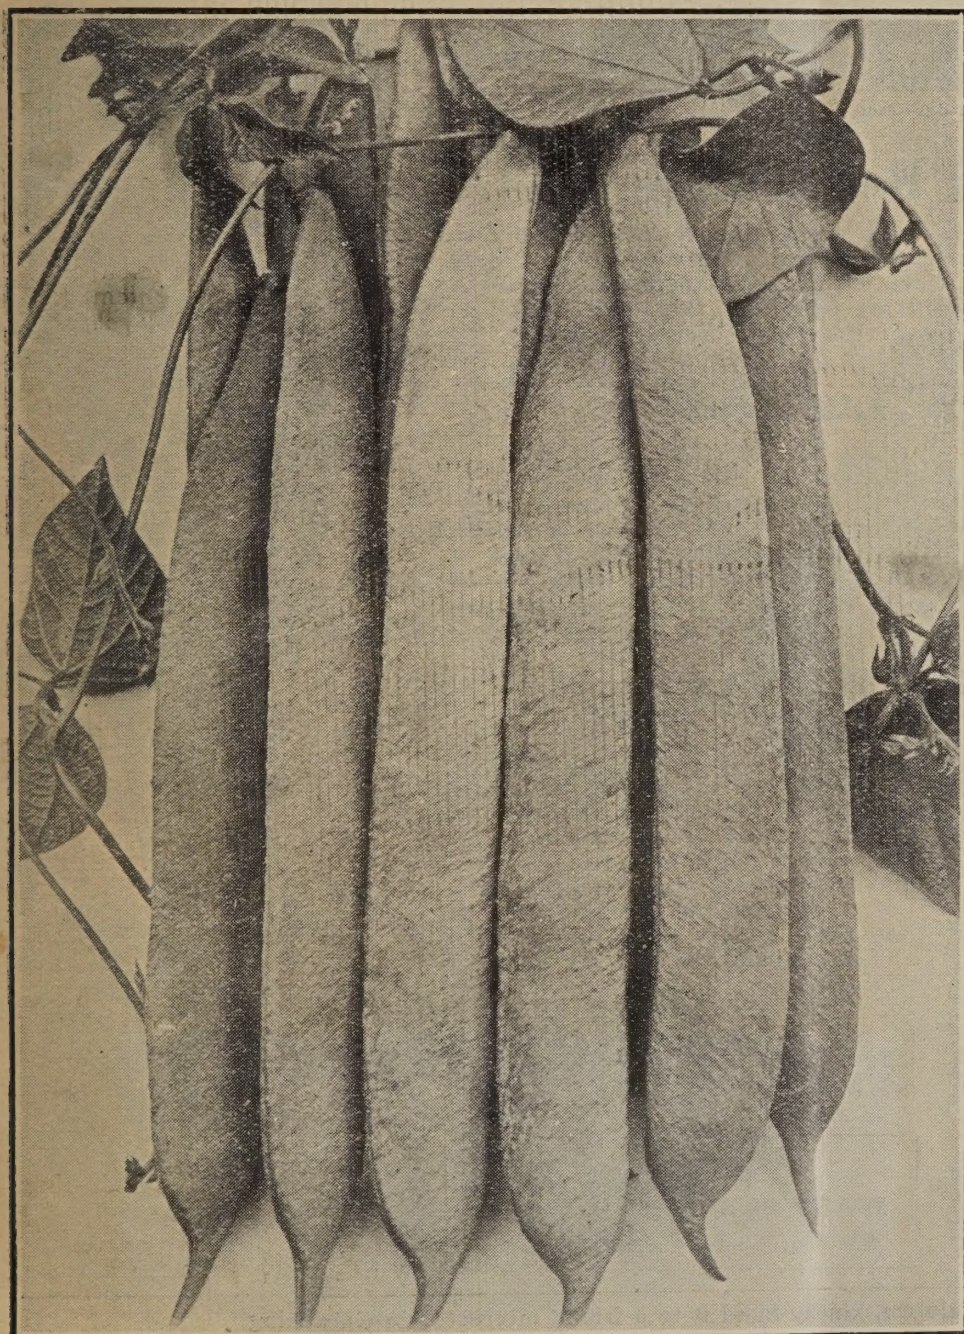

This is undoubtedly the finest Climbing Bean in cultivation. It is very early and enormously productive, the long, green pods hanging in clusters. The pods frequently measure from ten to twelve inches in length. They are always solid, brittle and entirely stringless and of excellent quality, and are produced through a long season. 1/- per packet.

NEW DWARF WHITE CLUSTER BEAN

This splendid new Bean is a sport from our well-known Climbing White Cluster. It is of true bush form, and, like the climber, enormously productive. The handsome flattish green pods average about eight inches in length, and are brittle, tender and perfectly stringless at all stages of their growth. Seed, 1/- per packet.

New Butter Bean—Early Golden Brittlewax

This is without doubt the earliest of all Wax Beans. Early Golden Brittle Wax is of such superb quality that it might almost be called "Best of All." The bushes are remarkably hardy and very prolific. The handsome, fleshy pods are stringless and tender. 1/- per packet.

Giant White Cluster Bean (from a photograph).

Climbing Stringless Bean "Epicure"

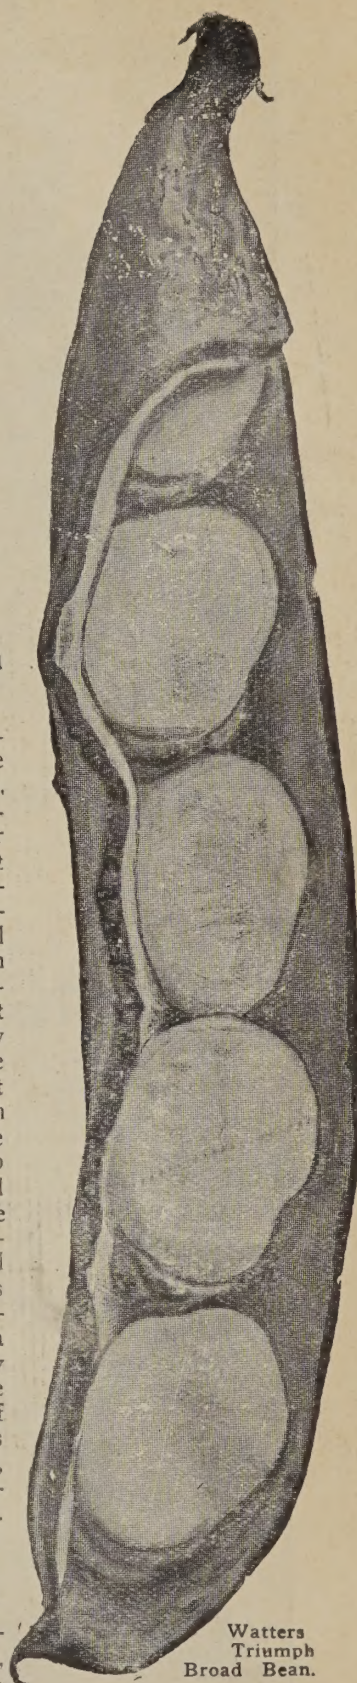

This splendid Climbing Bean has become remarkably popular, and has practically displaced all the older climbing varieties. It combines unusual hardiness, extreme earliness, and wonderful productiveness with pods of handsome appearance and finest quality. Extra early planting may be made to produce the earliest crop, and even with later planting is the quickest to come into bearing. By repeated plantings, pods may be had in constant succession from spring until cut off by heavy frosts in the autumn. Combined with the extra hardiness and early maturity, the pods are tender, brittle, and of finest flavour, always entirely stringless, even when fully matured. 6d. per packet.

Covent Garden Brussels Sprouts

This variety is a particularly fine selection, and a great improvement on the old type, being of dwarf sturdy growth and producing abundantly large, solid sprouts. 6d. per pkt.

Mammoth Broccoli

A large late variety, taking about eight months to mature from time of sowing the seed, and coming into use when the late Cauliflowers are over. Large white heads of extra quality. 6d. per packet.

Watters Triumph Broad Bean.

Improved Blood Red Turnip Beet.

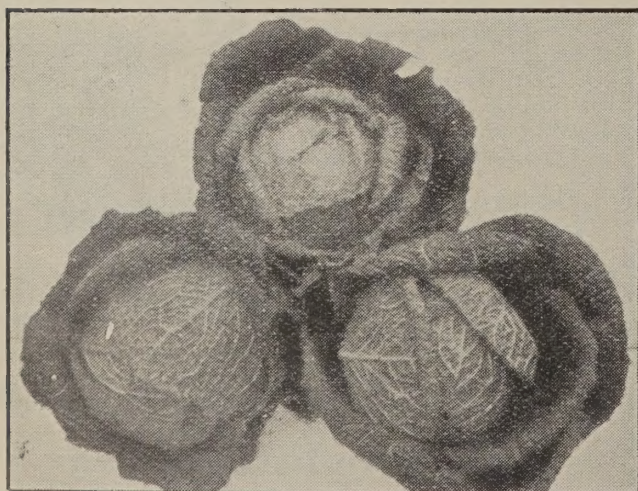

Watters Improved Blood Red Turnip Beet

This is a globe-shaped Beet of excellent quality. It is highly esteemed on account of its dark red colour. The roots are smooth and handsome, and are now being very largely used for market as well as for the home garden. It retains its good quality even after it gets large, and is an excellent variety on this account for both Autumn and Spring use. Another good feature of this variety is the uniformity of the roots. 6d. per packet.

Giant Silver Beet—"Lucullus"

This distinct variety is a great acquisition. The stalks are as thick and broad as rhubarb. The plants grow to a height of from 2 to 2½ feet, and the stalks are from 10 to 12 inches long below the leaf and 1½ inches broad. These stalks are delicious when cooked and should be served in the same manner as asparagus. The leaf portion is heavily crumpled or savoyed, and is very crisp and tender. The leafy portion of the foliage is cooked and served in the same manner as spinach. The leaves and stalks, being served as separate vegetables, afford two distinct dishes from the same plant at one time. 6d. per packet.

Selected Drumhead Savoy Cabbage

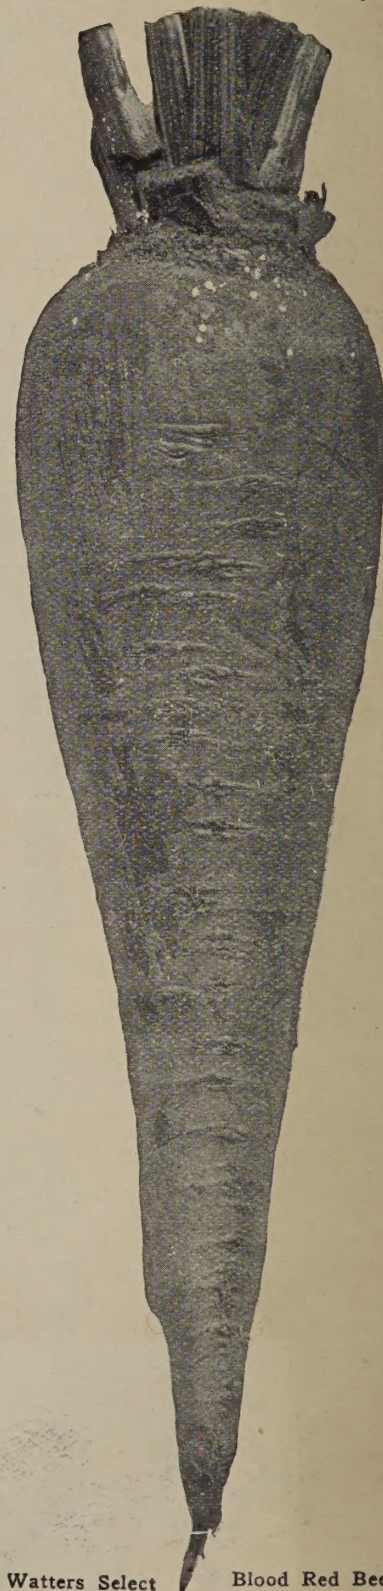

Selected Drumhead Savoy Cabbage.

Savoy or Crimped-Leaved Cabbages should be in every garden, and where once used, they will be planted again as their leaves are more tender and they are of much milder and sweeter flavour than all smooth-leaved varieties. Our selected Drumhead is the finest late variety, very sure heading, and producing large, solid heads of densely crumpled leaves, the interior beautifully blanched and of delicious flavour. Short stemmed, vigorous plants, with few outer leaves. 6d. per packet.

BEET
WATTERS BLOOD RED
The Best Garden Beet in Cultivation

Watters Select Blood Red Beet

This splendid variety is now extensively grown throughout the country, and is the finest Beet either for exhibition purposes or for table use. The root is of medium size, very handsome in shape, dark red, smooth, and of excellent quality, remaining crisp, sweet and tender for a long time. It is handsome in shape and colour. The skin is of a dark red colour, with flesh still darker. 6d. pkt.

Watters Select Blood Red Beet.

Should you have no use for this Catalogue, kindly hand it to a friend interested in Gardening.

CABBAGE

Copenhagen Market

Copenhagen Market is certainly a valuable early Cabbage, producing round, hard heads very early in the season. The plants are short stemmed, producing heads almost on the ground. The light green coloured leaves are medium in size, saucer shaped, and tightly folded; the plants may therefore be set closer than most other early varieties. It is a vigorous grower and yielder, as are all Cabbages from Denmark, and an excellent keeper. 6d. per packet.

Watters

Earliest of All Cabbage

The earliest Cabbage in cultivation, maturing about the same time as the Early Etampes. It is an ideal variety for those that like a Cabbage which is tender and of excellent quality, and at the same time occupying but little space in the garden. It is in every way one of the most desirable early Cabbages introduced, and we highly recommend it to anyone requiring a moderate-sized early Cabbage. The seed can be sown late in autumn or early spring. 6d. per packet.

Watters Surehead Cabbage.

Watters Surehead Cabbage

This fine Cabbage has gained steadily in public favour, and is now the favourite market Cabbage, being planted in preference to all other sorts for a main crop variety. No Cabbage introduced within the last few years has attained to such great popularity, or given such general satisfaction, as Watters Surehead Cabbage. The heads are remarkably uniform, very hard and firm, and the average weight is from 15 to 20 pounds per head, although we have seen specimens weighing 25 pounds. It is very sweet flavoured, has but few outside leaves, and is a sure header when most other sorts fail. 6d. per packet.

SPECIAL OFFER

of Watters Seeds for the Kitchen Garden

See Page 11

5/-

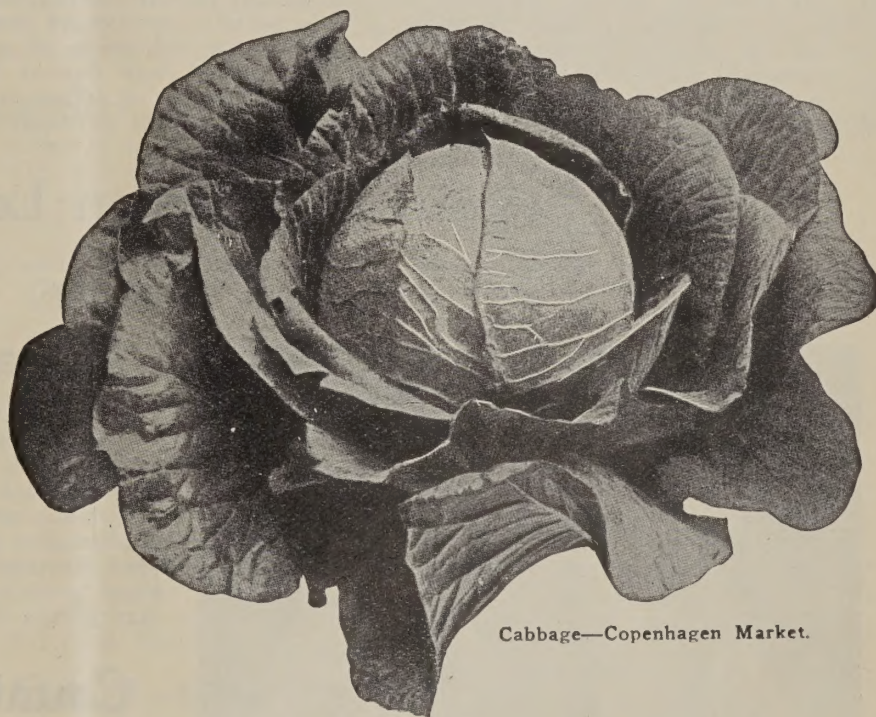

Watters Perfection Cabbage

This variety is the finest early large flat Cabbage in cultivation, and will be a welcome addition to our list of first-class Cabbages. The heads are extremely hard and solid, and will stand for a considerable time before bursting. We can strongly recommend this Cabbage as a variety of great merit. 6d. per packet.

Watters Earliest of All Cabbage.

Buyers of vegetable seeds in large quantities should look up our special market gardeners' price list, on blue pages in front of Catalogue.

Cabbage—Copenhagen Market.

Early Cabbage—Watters Express

With Earliest of All, it holds the place as the earliest Cabbage in cultivation. It is a few days earlier than Etampes. There are few loose leaves, and almost every plant forms a head. It can be planted close, and yields a large crop. This is the earliest of the many early Cabbages of the catalogues, excepting Watter's Earliest of All, which matures about the same time. 6d. per packet.

CABBAGES

Try EARLIEST OF ALL, PERFECTION, and SUREHEAD for an all-the-year supply—QUALITY UNEQUALLED.

Champion Scarlet Horn Carrot

This variety is a very productive one. It has an extra large shoulder, is easily dug, and is desirable in all respects. It is a stump-rooted sort, very smooth, fine in texture, and of a beautiful, rich, orange colour. For table use it is by many considered to be the best of all, both on account of shape and quality. The flesh, when cooked, is very tender. 6d. per packet.

Watters Perfection Carrot

A splendid strain of the intermediate type, but heavier cropping, earlier, and far superior in quality and size to the old variety. The roots are longer, of symmetrical form and handsome appearance; the flesh is firm, solid and sweet, with very little core; the best variety for main crop. 6d. per packet.

CARROT

Oxheart or Guerande

This is a variety from France, and is a decided acquisition. It is intermediate between the half long and short sorts, being about four inches long. The shape is nearly oval, and the colour and quality all that can be desired. 6d. per packet.

Carrot—Watters Improved St. Valery

This is undoubtedly the strongest and purest strain of the well-known St. Valery Carrot in cultivation. It produces very handsome, straight, smooth roots of bright red colour, frequently 12 inches long, and 3 inches in diameter at the neck and tapering regularly to a point. The leaves are very small for the size of the root, and, except in soil treated with fresh stable manure, which makes all root crops rough, the roots of this variety are always remarkably smooth and regular. The core is small and very tender, and there is no indication of woody character at any stage of its growth. It is also entirely free from any coarse rank flavour so common with many sorts. For private purposes it is ideal, and its yielding capacity is enormous, which, with its handsome colour and fine appearance, makes it invaluable to market gardeners. 6d. per packet.

Monstrous Carentan Leek

A very fine variety of extra large size and quick growth. The edible stem is from six to nine inches long, and the flavour is mild and agreeable. 6d. per packet.

Garden Cress

EXTRA FINE CURLED.

Grows very quickly and readily from seed sown thinly in drills during the spring, summer and autumn months. The leaves are finely curled and quite ornamental in appearance, but as the plant soon runs to seed frequent plantings should be made to keep up a supply. The flavour resembles that of the mustard. 6d. per packet.

Country Gentleman Sweet Corn

A first-class variety. The ears are of quite large size, and frequently three on a stalk. The grains are irregularly set on the ear. The cob is remarkably small, giving great depth to the compressed grains. The ears average eight to nine inches in length. For delicious flavour and sweetness none surpass this variety. 6d. per packet.

Sweet Corn—Golden Bantam

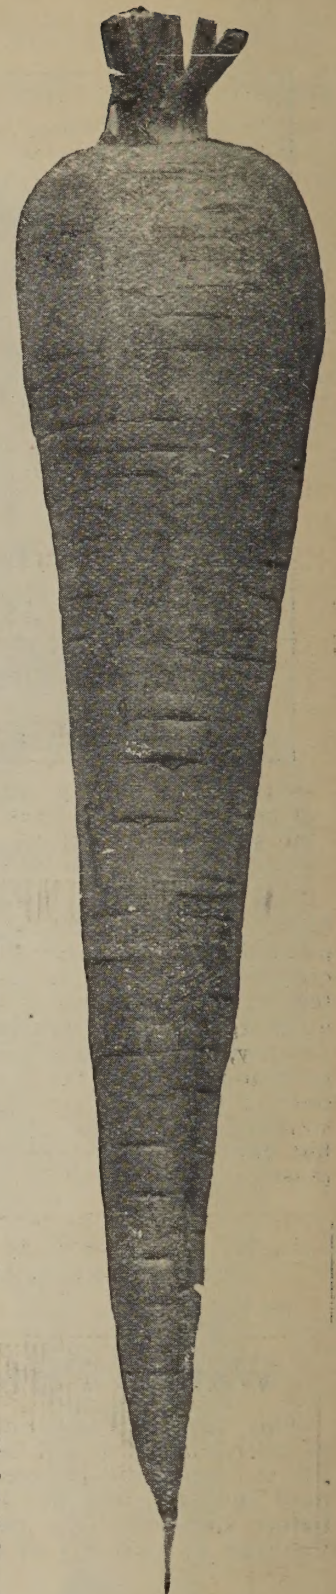

This variety is as distinct in flavour from that of white varieties as in colour, being almost literally as "sweet as honey." The skin is exceptionally tender, and does not need scoring or cutting across the grain. 6d. per packet. 2/- per lb. (postage extra).

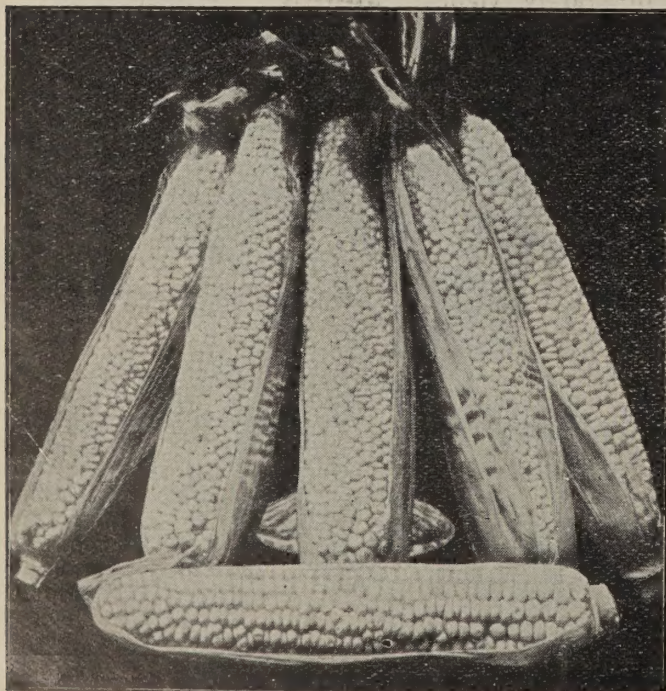

Watters Champion Scarlet Horn Carrot.

Carrot—Watters Perfection

The best for Market, Garden, or Private Use

Watters Perfection Carrot.

Sweet Corn or Table Maize.

**Watters
Hardy
Cauliflower**

Resists Heat and
Drought

Watters Hardy Cauliflower.

Watters Hardy Cauliflower

This grand Cauliflower originated in the Northern part of Africa, where it is largely grown on account of it being the only variety which can be depended upon to head in that dry country. While specially adapted for growing in dry districts, where other varieties will not produce heads, it will do equally as well under more favourable conditions. Sow the seed either in December or January for the first crop, and up till May for a succession. 6d. per packet.

Early Snowball Cauliflower

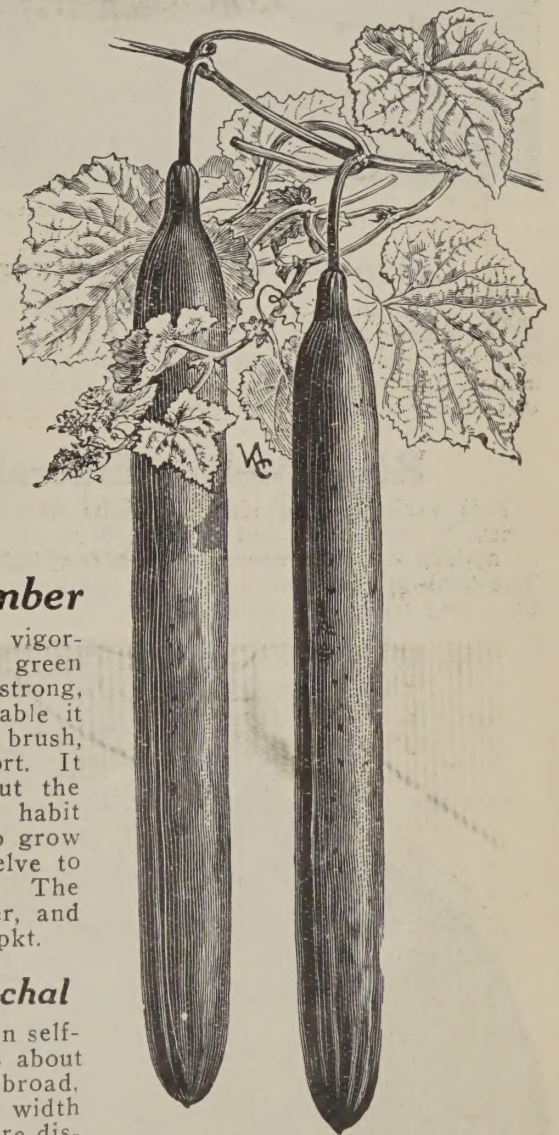

This is a large variety, with fine, well-proportioned heads. The heads are so well protected by the foliage as to remain a long time fit for use. It is one of the earliest and finest Cauliflowers, and, whether planted early or late, it is the surest header of all. 6d. per packet.

WATTERS IMPROVED ALL SEASONS CAULIFLOWER

A pure white, very solid variety, which has been rightly named "All Seasons," seeing that it can be sown with equal prospects of success at any season of the year. Our strain is an improvement on the original one, in that the flowers are larger and more uniform. Whenever the Cauliflower is ready it is of splendid quality, and we cannot too strongly recommend it. 1/- per packet; 5/- per ounce.

Improved Telegraph Cucumber

This fine Cucumber grows from twelve to sixteen inches or more in length, and is of superior quality. The vines are of strong growth, and the fruit, which is freely produced, is very uniform in shape; the colour, a rich dark green, is retained for a considerable period. We offer an improved and selected strain that for table use cannot be excelled. 1/- per packet.

Telegraph Cucumber.

Japanese Climbing Cucumber

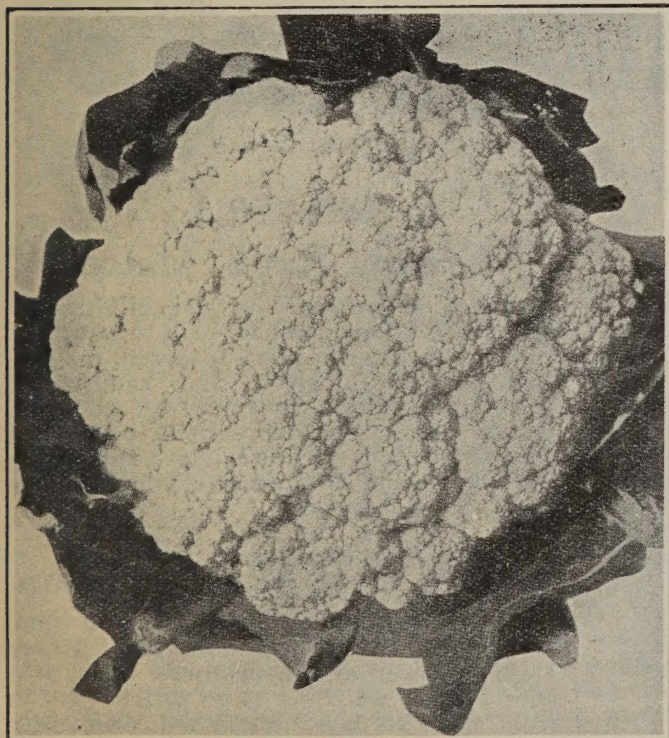

The vines are of healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush, or any other suitable support. It bears abundantly throughout the season, while the climbing habit enables the hanging fruit to grow perfectly straight; from twelve to sixteen inches in length. The Cucumbers are thick, tender, and of delicate flavour. 6d. per pkt.

Celery—Giant Paschal

A selection from the golden self-blanching Celery. It grows about two feet high; the stalks are broad, thick and stringless. The width and thickness of the stalks are distinctive features of this variety. 6d. per packet.

Celery—White Plume

Naturally white or light coloured foliage; requires but little banking up to blanch; in fact, the plants may be blanched by simply tying the stalks together when well grown. Crisp, solid and equal to the best in flavour. 6d. per packet.

Improved All Seasons Cauliflower.

Summer Market Lettuce.

Lettuce—Watters Great Heart

An exceedingly large and handsome variety. The plants attain a diameter of from 12 to 14 inches, the outer leaves are broad and of a light green colour. The heads are crisp and tender, and remain so when most varieties become tough and soft under our hot summer sun. 6d. per packet.

Rock Melon—Emerald Gem

This variety is of rich, delicious flavour, and fine quality. Distinct, very early and prolific; skin ribbed, yet smooth, and of a deep emerald green, with a few lighter-coloured stripes. The flesh is thick, of a suffused salmon colour. A very high-flavoured fruit. 6d. per packet.

Miller's Cream Rock Melon.

NEW LETTUCE

Watters Summer Market

Among many new varieties, this Lettuce has taken a leading place. It is easily the most reliable of the summer varieties, hearting well under conditions where most other sorts would fail. It grows to a large size, folds in quickly, and is exceedingly crisp; the hearts are solid, and remain firm a long time without running to seed. 6d. per packet.

Watters Model Summer Lettuce

This excellent Lettuce deserves to be largely grown. Of its many good qualities, perhaps the best is the remarkably long time it will stand before bolting to seed, outlasting most other varieties in this respect. Although called a Summer Lettuce, on account of its capacity of resisting heat and drought, it is early, very hardy, and may be safely sown at any season. 6d. per packet.

Special Offer of Watters Seeds for
5/- *Quality and Quantity.*

See Page 11

Watters Great Heart Lettuce.

MILLER'S

Cream Rock Melon

This is, in our opinion, one of the very finest red-fleshed varieties in cultivation. The fruits are medium to large in size, slightly oval in shape, and handsomely netted. The flesh is extremely and uniformly deep, of a rich salmon colour; of peculiarly firm texture, yet thoroughly melting, having no stringy character whatever. 6d. per packet.

Bonny Best Water Melon

The earliest Water Melon in cultivation. It originated with a famous New Jersey Melon grower and hybridiser. Will produce Melons weighing 15 to 20 lbs. each in from 60 to 70 days. Flesh red, deliciously sweet, with but few seeds. 6d. per packet.

PARSNIP

Watters Improved Hollow Crown.

This is the best of all Parsnips, either for the market gardener or amateur. It is a highly improved type of the Hollow Crown, producing uniform large and handsome roots of stocky form, heavy at the shoulder, well rounded, and tapering to the base. Flesh white, of fine texture, free from core and stringiness, and fine flavoured. This improved strain is enormously productive, and the roots are exceptionally smooth. 6d. per packet.

Watters Selected Brown Spanish Onion

Heavy Cropper Finest Quality Best Keeper

Onion—Mammoth Silver King.

MAMMOTH SILVER KING ONION

This grand Onion has come rapidly into public favour. The skin is a beautiful, silvery white. The flesh is so sweet that it may be eaten raw like an apple. No other white Onion attains such mammoth size. The bulbs are of an attractive shape, flattened, but thick, as shown in the illustration. The average diameter of fully-grown Mammoth Silver King Onions is from 5 to 7½ inches. 6d. per packet.

Watters Selected Brown Spanish Onion

An improved strain of the popular Brown Spanish. It is now almost universally grown where a first-class main-crop Onion is wanted. It is an excellent keeper, remaining quite sound long after other varieties have decayed. 6d. per packet.

Early Golden Globe Onion

Bright golden colour, mild flavour, fine quality. The earliest brown Onion in cultivation, and yields good crops under favourable conditions. The bulbs are of medium size, of a light golden yellow colour; and the flavour is very mild. 6d. per packet.

WHITE SPRING ONION

(White Lisbon).

The Best Variety for Spring Onions.

CAN BE SOWN THROUGHOUT THE YEAR.

A mild and pleasant white Onion, of somewhat flattened shape. It is very popular for family use, and one of the best for pickling. A favourite with many when young as a salad Onion; excellent for winter. This variety is largely grown for spring Onions, and is regarded as a standard sort on account of doing well at all times. A small bed, sown every month, will ensure a continuous supply of Spring Onions throughout the year. 6d. per packet.

ABOUT OUR ONION SEED

As all our Onion Seed is grown in large quantities, we are able to offer the very best seed obtainable at very low prices to large growers.

Early White Queen Onion

The Earliest White Onion Grown.

The favourite early white Onion. The bulbs grow to a good size, ripen very early and evenly, and are very good keepers. The skin is beautiful, clear white, and the flesh is mild and sweet. Extensively used for pickles, also grown for early bunching, green Onions, and also for large Onions for autumn and winter use. Our stock is the finest grown. 6d. per packet.

Parsley—Extra Fine Curled

This greatly improved strain was introduced by us a few years ago, and, owing to its beautiful appearance and rich flavour, is greatly in demand. A quick-growing, distinct dwarf and handsome variety of compact growth, with finely cut and closely curled leaves of a deep emerald green colour; very attractive when used for garnishing, but very valuable also for flavouring, the leaves being very aromatic. The best variety for general cultivation. 6d. per packet.

Watters Selected Brown Spanish Onion.

Improved
Hollow
Crown
Parsnip

Postage Rates on Peas
and Beans. 9d. per lb.

American Wonder Pea

This is a first-rate wrinkled Pea of dwarf habit, with vines less than a foot high. It is better suited to the private garden than for market purposes. American Wonder is one of the earliest of the wrinkled varieties. It is quite distinct from all other Peas in habit of growth and appearance, the vines being unusually robust and stocky. In favourable weather and soil it will mature in a remarkably short period. It makes most rapid growth immediately after the soil has become somewhat warm. 6d. per packet; 1/6 per lb., postage extra.

Gardeners who purchase vegetable seeds by the pound should look up our Special Market Gardeners' Price List in front of Catalogue.

Pea—
Early
Marrow.

PEA—Watters Early Marrow

A first early wrinkled Pea, growing to a height of about two feet. The pods are of a deep green colour, very large and handsome. Each pod contains from 8 to 10 large Peas of full marrowfat flavour. 1/6 per lb.; 6d. per packet.

DAISY PEA

The haulm, on an average, grows to a height of eighteen inches, and is practically covered with handsome pods five inches in length, containing eight to ten deep green-coloured Peas of the finest quality. 1/6 per lb.; 6d. per packet.

Watters Dwarf Champion Pea

This large podded marrowfat Pea is undoubtedly one of the finest dwarf wrinkled Peas in cultivation. It produces uniformly large pods, measuring four inches and over in length, and filled with from 6 to 8 large Peas of unsurpassed flavour. No other large podded marrowfat Pea can compare with this variety in extra earliness. It is particularly level and neat in habit of growth, the haulm seldom exceeding 12 to 15 inches in height. Price, 1/6 per lb.; 6d. per packet.

Sugar Pea—"Earliest"

Large, Edible Pods. Earlier than Any Other Variety.

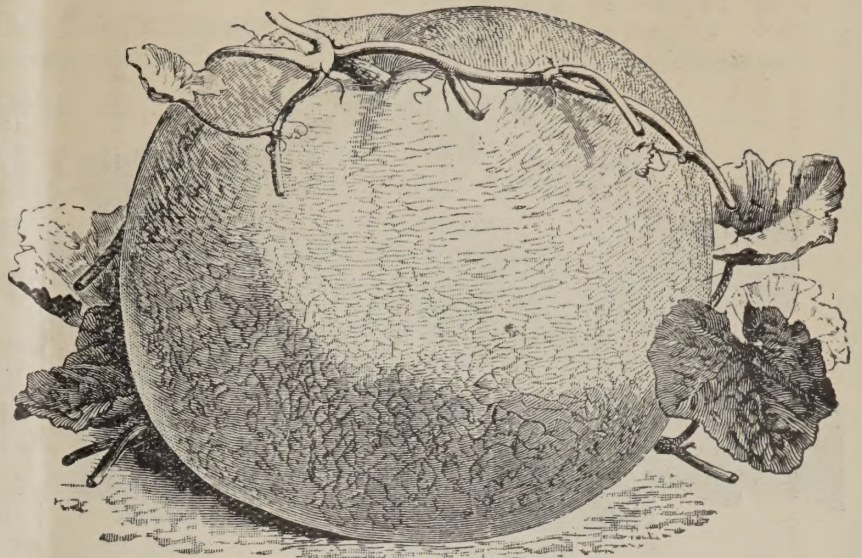

This splendid Sugar Pea is of quick, but sturdy, growth, and about 1½ feet high. The plants produce a great number of pods, quite 4½ inches long by 1½ inches wide, which are of excellent flavour when cooked. The Peas are produced continuously for a considerable period. The sweetness and tenderness of this edible podded Pea should ensure it a permanent place in every garden. 6d. per packet.

Earliest Sugar Pea.

Globe Mammoth Pumpkin

This is similar to the Mammoth Pumpkin, except that the gigantic fruits, instead of being flattened in form, are thicker through, and entitled to be called "globe-shaped." The Pumpkins grow to an enormous size, and in shape they are quite round. The skin is of a rich salmon colour, the firm, fine-grained flesh is of a deep yellow colour, sweet flavoured and very thick. No other Pumpkin can surpass it in quality, although it attains a much larger size than any other table Pumpkin. 6d. per packet.

Globe Mammoth Pumpkin.

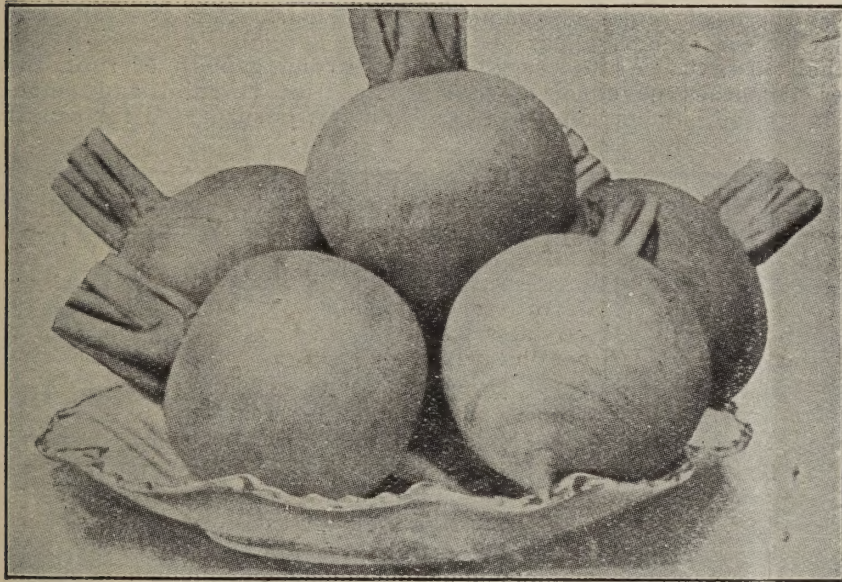

LONG CHARTIER RADISH

Of attractive appearance, being scarlet at top, shading to pink in the middle, and to pure white at the tip. It resembles Long Scarlet in shape, but will grow to about twice the size. It continues growing for a long time without getting pithy or going to seed. 6d. per packet.

*NOTE—Superior Quality of our Seeds
Moderation of our Prices
Punctuality of Despatch*

Early White Turnip—Mont Blanc

This variety is the finest white-fleshed early Table Turnip that we know of. The flesh is beautifully white, fine grained, and of delicious flavour, and when grown quickly never becomes pithy or stringy. The beautifully-formed, globe-shaped bulbs come to maturity almost as early as the Early White Milan. For exhibition or general use this variety is unsurpassed. 6d. per packet.

Mont Blanc Turnip.

EARLY WHITE MILAN TURNIP

As early as the Early Purple Top Milan, and possesses all of its good qualities. The entire bulb, inside and out, is clear ivory-white in colour; the outer surface is perfectly smooth. It grows so quickly that even the outer surface of the bulb is quite tender. Its table qualities are unequalled, being of most delicate flavour and tempting appearance 6d. per packet.

Selected Garden Swede—Purple Top

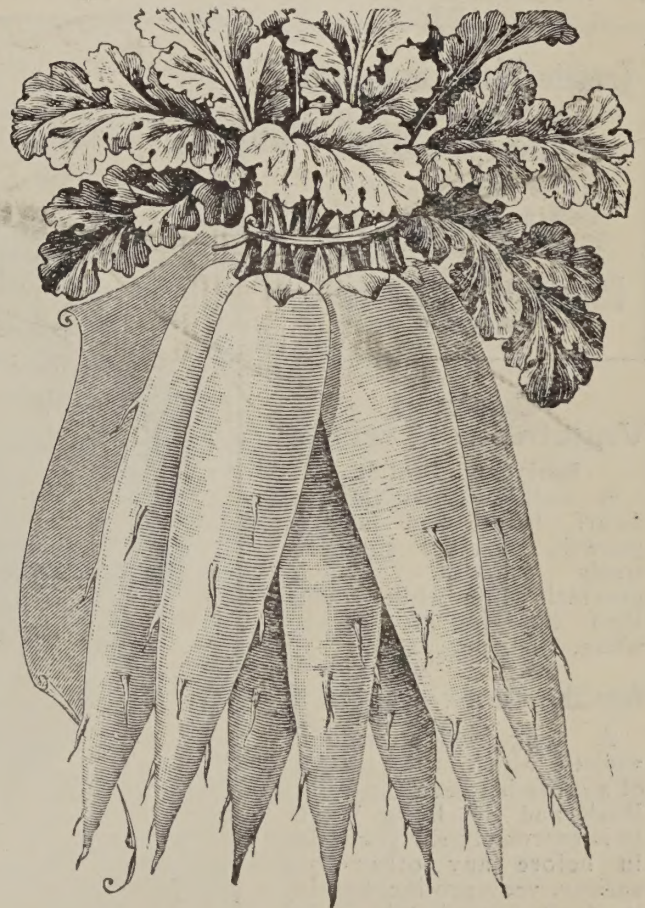

Finest for Kitchen Garden

Invaluable for garden culture. The bulb grows as clean and smooth as a turnip. The flesh is of a deep yellow colour, and the table qualities are unsurpassed; texture fine-grained and tender; flavour sweet and rich. It is of quick growth, and adapted for spring, summer or early autumn planting. 6d. per packet.

*Special Discount on all Orders for
Seeds in Packets*

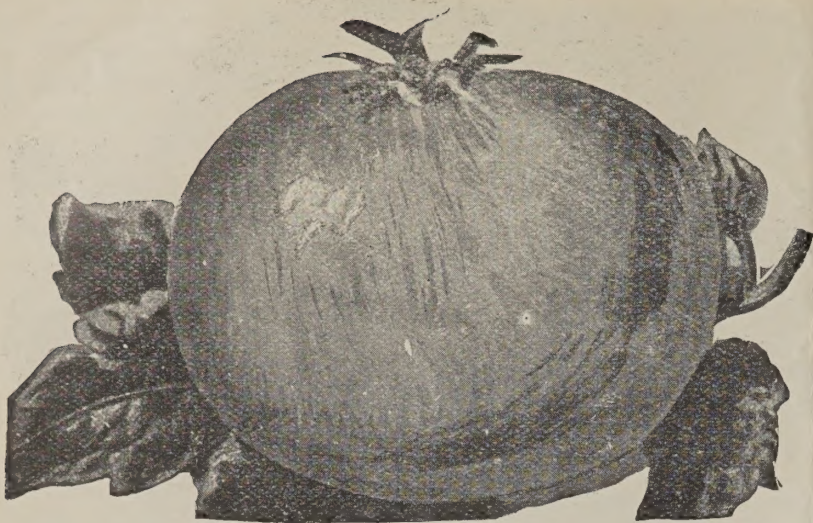

Long White Icicle Radish

A fine variety for market and private gardeners who require an early long white Radish. The Icicle is perfectly white in colour, and long, slender and tapering in shape. It quickly grows to market size, is crisp, brittle, and of mild, sweet flavour. It remains tender during the entire growing period, and is quite as good when an inch in diameter as when only half an inch. A most excellent and profitable variety. 6d. per packet.

Icicle Radish.

SPECIALTIES IN VEGETABLE SEEDS—Continued

New Tomato—Alacrity.

Early Tomato—Alacrity

A Vigorous and Healthy Grower.

A vigorous grower, early, and enormously prolific, with a good spread of foliage, which will protect the fruit from the hot sun, on days when early varieties with less foliage would scald. In shape it is roundish and slightly flattened at the stem end, but thicker through than most other Tomatoes in its class. In colour it is a beautiful scarlet red, setting its fruit in clusters of five or more at close intervals. Price, 1/- per packet.

TOMATO — WATTERS CRIMSON BELLE

This is an ideal Tomato, and without a doubt the earliest in cultivation. It is not only extremely early, but of particularly fine quality, which is very rare in an early Tomato. The fruit is of medium size, smooth, flattish round in shape, of a crimson scarlet colour, solid and meaty, producing very few seeds, and entirely free from hard, woody core. The plant bears in phenomenal abundance and continuously until killed by frost. During its trials, Crimson Belle bore fully ripened fruits when no other variety had begun to show colour. 6d. per packet.

WATTERS—MAINCROP TOMATO

A most reliable and distinct variety. The plant, which is of vigorous growth, produces an abundance of fruit in clusters, each cluster containing from six to ten fruits. The fruit is spherical in shape, and of a deep crimson colour; the flesh is very firm, and of excellent quality. 6d. per packet.

New American Tomato—"Matchless"

Besides being extremely hardy, this is the best large-fruited smooth main-crop Tomato. It is a strong, vigorous grower, with thrifty vines, which produce large, handsome Tomatoes most abundantly throughout the season. The fruits, of a rich cardinal red, are remarkably solid and smooth, free from core, and uniformly of the finest flavour. 1/6 packet.

NEW TOMATO—American Coreless (A Distinct and Superb Tomato)

The fruit of AMERICAN CORELESS is absolutely free from hard core, the seed cells being surrounded by bright red meaty, delicious flesh.

It is, without question, the best early home garden Tomato. The bright scarlet fruits are smoothly round, very deep, and solidly meaty, with only a few quite small seed-cells, and are of remarkably fine sweet flavour. For general garden planting, or where an extra fine fruit is desired, American Coreless is unrivalled.

The plants root well from the very beginning of their growth. As the result of this strong growth of root, there is a large and vigorous vine, giving larger crops than other Tomatoes of equal acreage. The fruit is solid and smooth, easily prepared for market on account of its perfection. It is a good shipper, does not crack or rot; unsurpassed for canning. 1/6 per packet.

Tomato Plants in Season

We can supply all Leading Varieties obtainable from September to December.

2/- per dozen, post free.

4/6 per 50, post free.

7/- per 100, post free.

Packed carefully in strong cardboard boxes and moist moss, to ensure their safe arrival.

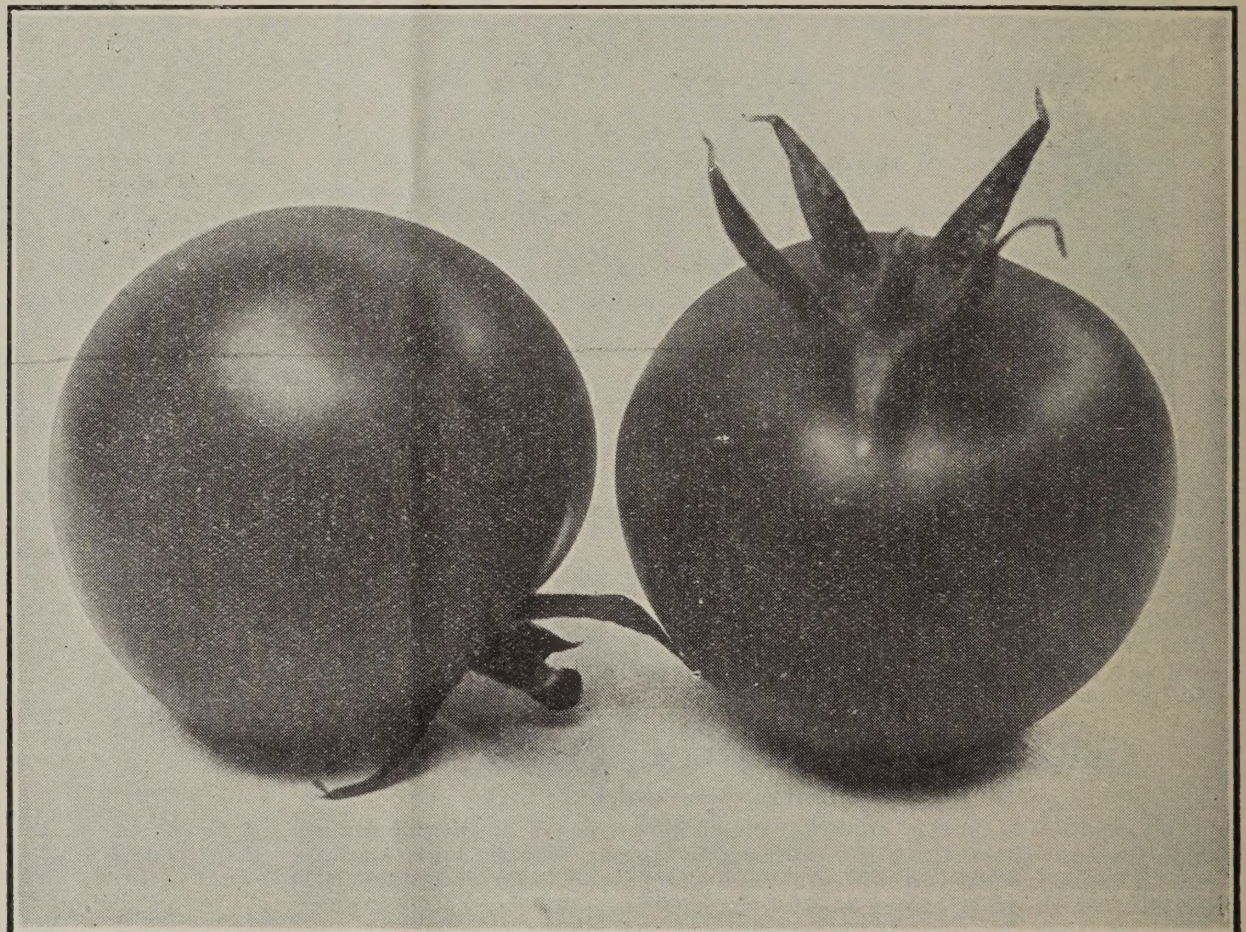

Custard Vegetable Marrow

Early and Prolific.

A well-known variety of dwarf habit and upright growth. Surface comparatively smooth. Colour, greenish-white while young; then changing to creamy white. 6d. per packet.

Vegetable Marrow—First of All

A long white running variety, which is the product of a cross between the White Bush and the Long White. It is extremely early, coming in before any other long variety, very prolific, bearing its fruit immediately it begins to run. 6d. per packet.

American Coreless Tomato (from a photograph).

Our Collections are made up in the same liberal manner as heretofore. Intending purchasers will kindly bear in mind that it is only by having seeds specially grown, and by preparing the packets in large numbers, that we can be so liberal in the quantity of the seeds supplied for the amount charged. We therefore wish it to be understood that no alteration can be allowed in any of the collections.

Flower Seed Specialties

Superb Half-Dwarf Antirrhinums

The Antirrhinum has now become an established favourite in our gardens, and this is not to be wondered at when we consider the extended season during which they bloom, together with the exquisite beauty of their flowers and their great value for cutting. The dainty shades of pink, rose, salmon and other light colours are most beautiful, while the gorgeous, glowing scarlet and orange-scarlet varieties immediately arrest attention and are the admiration of all. These semi-tall varieties are about twenty inches in height, and produce most lavishly magnificent spikes of flowers of the largest size.

SUNRISE—Standard old rose, suffused orange, deepening on falls to terra cotta, yellow lip, white throat. A grand bedding variety. 6d. per packet.

ELEGANCE—Bright rosy mauve, pencilled deeper shade on standard, white throat. 6d. per packet.

OLD ROSE—Soft blush pink, suffused a delicate terra cotta tint 6d. per packet.

MAIZE QUEEN IMPROVED—Much improved for colour and size of flower. 6d. per packet.

NELROSE—Silvery pink, very long stems; a very beautiful variety. 6d. per packet.

FLAME—One of the most brilliant varieties, colour lovely orange scarlet; splendid for bedding. 6d. per packet.

ENCHANTRESS—A beautiful variety, colour a beautiful almond-blossom pink. 6d. per packet.

VICTORY—Rich terra-cotta orange, shading to yellow; a good bedding variety. 6d. per packet.

PURITY—Pure glistening white, very fine; the best of its class 6d. per packet.

(Finest Mixture of the above sorts, 6d. per packet.)

Goliath Asters

All Colors Mixed

A magnificent strain of Aster, borne on long stems, of tall branching habit. The flowers are of all colours known in Asters, measuring 6 to 8 inches across, extremely double, with gracefully curled petals resembling a Japanese Chrysanthemum. As a cutting variety it has no equal. 1/- per packet.

Aquilegia—Improved, Long Spurred.

Aquilegia

IMPROVED LONG-SPURRED VARIETIES.

Too much praise can hardly be lavished upon these elegant and beautiful perennials. The strain we offer comprises varieties and shades of colour never before seen in the long-spurred Columbines. The seed has been carefully saved from only the best and largest varieties of a very choice collection, and may be relied upon to produce an extremely wide range of colouring, as well as a good number of new shades. Seed, 6d. per packet.

Watters Giant Flowering Asters

It would seem as if the highest possible perfection had been attained in these truly grand Asters. They win enthusiastic admiration from all who see them. The flowers are of immense size, often 6 inches across, composed of long, wavy, twisted petals, resembling some of the finer Japanese Chrysanthemums. The plants are of luxuriant growth, attaining a height of 18 inches, each plant bearing from 20 to 30 of these magnificent flowers on long stems, which give them added value for cutting for vases. 1/- per packet.

Giant Tasmanian Branching Asters

A RACE OF WONDERFUL BEAUTY.

A splendid race of Asters. The plants are of strong growth, and are very free-flowering. Their chief merit lies in their distinct branching habit, the blooms being produced on strong stems eighteen to twenty-four inches in length. As cut flowers for vases and for garden beds they are superb. The blooms are of the Comet type, particularly handsome, and have unusual and lasting substance. 6d. per packet.

Watters Giant Aster.

Giant Crested Anemones

This beautiful strain of Anemones should find a place in every garden. The plants bloom very quickly from seed, and the flowers are freely produced over a long period. Some of the flowers are beautifully crested, others are perfectly double; but the climaxing merit of all is the wonderful variety of colouring, which ranges from white, pink, scarlet and crimson to blue, with all intermediate colours. 6d. per packet.

BALSAM

CAMELLIA-FLOWERED, EXTRA CHOICE.

Our seed has been saved from a collection of the finest double varieties, and is the most magnificent strain of perfectly double Balsams in cultivation. The colours are extremely brilliant and varied, and the habit of the plants perfect. 1/- per packet.

Carnation

New American Perpetual

The plants are thick-set and bushy; stalks stiff and upright, bearing immense double blossoms of perfect regularity, some with fringed edges, some smooth, some with rich, solid colours, others tinted and blended, and others with featherings and picotee markings, and all perfuming the air with their sweetness. 1/- per packet.

Giant Crested Anemones.

Japanese Chrysanthemums

Newest Varieties Mixed, Beautiful New Colours, Superb Double Flowers.

There are many people who do not realise how easily these flowers may be grown from seed, and that all of the magnificent new varieties were raised from hybridised seed, similar to that we are now offering. The range of colour, which is almost endless, includes many shades of Pink, Yellow and Red, as well as a good percentage of White. The seed we offer is of the choicest strain. 6d. per packet.

COSMOS

DOUBLE CRESTED—MIXED.

This new type of Cosmos is unique and exceedingly pretty. The flowers are of good size, with fully double centres and an outer row or crest of broad ray petals. The plants are vigorous, attaining a height of five feet, and are covered with blooms from early autumn until cut down by frost. This is the best of all Cosmos for cut flowers, lasting well in water, and the dainty colours are most attractive for either garden or table decoration. Our strain is unsurpassed. 1/- per packet.

Camellia-Flowered Balsam.

Cosmos—Mammoth "Autumn Glory"

These are the latest development in this favourite autumn-flowering annual. The flowers are often 4 to 5 inches across. This strain has been developed into a great variety of colours, from pure white to deep crimson. The flowers are borne on long stems, making them highly desirable for cutting purposes. Price, 6d. per packet.

CELOSIA PLUMOSA

Makes fine plants for large beds or groups, the plumes can be cut and dried for Winter bouquets.

THOMPSON'S "MAGNIFICA," Mixed Colours.—A very superior type of mixed Celosia, forming pyramidal, branching plants 3½ feet high, and bearing large, conical, plumed heads of either golden-yellow, fiery-scarlet, purple, salmon, blood-red, etc. The plants are annuals, growing easily and quickly from seed, and present a very showy appearance in the summer garden, lasting long in bloom. 6d. per packet.

Cineraria Stellata

ALL COLOURS—FINEST MIXED.

These beautiful Star Flowered Cinerarias are becoming very popular for winter and early spring displays in the garden. They are splendid for bedding, the plants being literally covered with the beautiful star-shaped flowers. This mixture contains a most varied assortment of colours. 1/- per packet.

Thompson's Magnifica Celosia.

DELPHINIUM Giant Hybrids

A beautiful class of Delphiniums. The individual blossoms are of immense size; some are single, others are semi-double. The flower spikes vary in length from 2 to 5 feet. The colours and shades are exquisite, ranging from pure white up through every conceivable shade of blue to deep purple, several shades of colour ranging through light blue and lavender to a darker hue, being blended in some of the varieties. 1/- and 2/- per packet. (Strong plants available during Autumn and Winter, 10/- dozen.)

Mammoth Double Daisies

No amount of praise can be too lavish for this form of charming Double Daisy. The flowers are from two to three times larger than ordinary Daisy, very perfect, and double. Only two colours of these giant varieties have as yet been raised—the beautiful White and a Bright Red. Not only do these Daisies bloom early in the spring, but continue through the summer, and also make splendid pot plants, flourishing in cool windows and rooms where few other plants will survive. Mixed colours. 6d. per packet.

New Cosmos Flowered Dahlias (Finest Mixed)

These Dahlias promise to eclipse all others. Wherever grown, they have caused intense interest. As cut flowers, they are much superior to ordinary singles, lasting double the time in water. A large percentage come true from seed. The colours range through all shades of crimson, scarlet, rose, pink, yellow, and white. These Dahlias bloom the first season from seed. 6d. per packet.

DIANTHUS

Double Fringed and Ruffled Varieties. Large Flowering.
Finest Mixed.

This strain produces beautiful double flowers, 2 to 3 inches across, with deeply-cut and fringed petals. The colours are exceedingly rich and varied, ranging from pure white to all shades of pink and red, while others are daintily zoned, splashed and striped. 6d. per packet.

Double Fringed Dianthus.

Giant Hybrid Delphinium.

Wild Flower Garden

Choice Mixed Seeds.—A mixture of many varieties of beautiful, easy-growing flowers, producing constant and varied bloom the whole season. 3d. per packet; 1/- per oz.

FERNS

Choice Varieties, Mixed.

Ferns can be grown easily from seed. Fill a clean pot with fine earth. Put the pot in a saucer and immerse with boiling hot water to kill all weed seeds or insects in the soil. After the soil has cooled, strew the fern seed over the top of the soil, but do not cover it. Put a piece of glass on top of pot, and keep the saucer full of water. Never put water on top of soil. In a short time the soil will be covered with a green, moss-like growth, and in a few weeks the little fern leaves will appear. The young sprouts should then be transplanted into small boxes or pots. 6d. per packet.

DOUBLE GODETIA

New Colours, Finest Mixed.

A double-flowered strain of this most popular flower. The range of colour is varied, and the blooms produce a more brilliant display than the single varieties. They are beautiful for solid beds, border lines, pots, and for growing in shaded places, where so few really fine flowers will flourish. Sow seed in the open border in spring, or in a coldframe, and transplant seedlings to stand a foot apart. Fine for cut flowers. 6d. per packet.

New Double "Exquisite" Hollyhocks

For many years little advance has been registered in the celebrated very double class of Hollyhocks originated by Chater. In this strain an important development, which will no doubt create widespread interest, is announced. The flowers of this splendid new Hollyhock are very large, measuring 4 to 5½ inches across, and possess the charming new feature that every petal, both of the circumference and centre, is exquisitely curled and fringed to an extent that immediately arrests the gaze of the beholder. The flower is extremely double, and some have fancied to see in it a resemblance to the beautiful double fringed Petunia. Each white margined petal is adorned with a large blotch (suggesting the markings of a Pelargonium), and the range of colour at present includes rose, light rose, carmine rose, violet and dark purple. 1/6 per packet.

Giant Hybrid Gaillardias

Mammoth Blooms in New and Choice Colours.

The flowers are extraordinarily large, often 4 to 5 inches across, and very highly coloured in great diversity of variations and blendings, including such combinations as scarlet with gold edge, blood-red with yellow edge, golden with scarlet border, pure yellow, fiery crimson, and many others. As cut flowers they are almost unrivalled. 6d. per packet.

GLADIOLUS

GIANT FLOWERING HYBRIDS.

These beautiful flowers are fast increasing in popularity, and, as decorative plants for the garden, should certainly be placed in the front rank. It is not generally known how easily Gladiolus can be raised from seed. If the seed be sown in early autumn, the plants will flower the same season, and from spring-sown seeds will bloom the following summer. This strain comprises extra large flowers of perfect form and of the greatest beauty, embracing a range of diversified colouring through the various shades of blue, red, pink, etc., the blue shades being particularly novel and beautiful. 1/- per packet.

Kochia Trichophylla

(Summer Cypress).

This beautiful annual bush is rapidly coming into prominence. It grows 2 to 2½ feet high, and resembles a closely-clipped ornamental evergreen shrub of a pleasing light green colour. In early autumn the whole bush becomes carmine. 6d. per packet.

Giant Flowering Heliotrope.

Flower Garden
Calendar

See Page 26

Our Choice Collections of
FLOWER SEEDS
Unequalled for Value

Double "Exquisite" Hollyhocks.

Imperial Branching Larkspur

Beautiful Spikes of Double Flowers.
Mixed Colours.

This is a much improved type of Larkspur. The flowers are very large, double, and produced in many beautiful colours, shades and markings. The branching habit renders this strain of exceptional value for cutting. Seed sown in spring produces a fine show of bloom throughout the summer. 6d. per packet.

Nemesia Strumosa Grandiflora

This charming Annual is becoming very popular, on account of its great bedding value. The flowers are of almost endless diversity of colours or shades, including white, yellows from cream to ochre, orange red to deep crimson. This strain is specially selected, and seed is saved only from the largest and the finest flowers. Mixed colours. 6d. per packet.

Heliotrope (Giant Flowering).

The heads of blossoms of this new type often measure nine to twelve inches across. The plants grow about 18 inches high, and are compact and bushy, while the colours range from pure white through all shades of violet and blue to deep indigo. Their fragrance is most delicious and powerful. 6d. per packet.

Mimulus—Hurst's Monarch

Magnificent strain, embracing a wonderful range of brilliant colours, beautifully marked and spotted. Giant flowers. 1/- per packet.

Watters Giant Petunias

A strain of incomparable size and beauty. Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous dimensions (4 to 6 inches across), but their great merits lie in the tremendous variety of colours, markings, veinings, blotches and stripings, in most grotesque and beautiful combinations; some with charming deep throats of yellow, white, black, green or maroon running off into intricate veins. Some colours are rich and gorgeous; others of lovely delicate shades. 1/6 and 2/6 per packet.

Petunia

Single Fringed, Finest Mixed.

Beautiful, large, single flowers, embracing all colours, from pure white to the darkest blue and crimson. All the flowers are beautifully fringed and delicately and distinctly veined. 1/- per packet.

Banana-Flavored Passion Fruit

This grand climbing vine—one of the most valuable ever introduced—is well worthy of a place in every garden. It is extremely hardy, and adapts itself to all situations. It is a vigorous and fast grower, attaining fifteen to twenty feet in height, and produces large golden-yellow edible fruit, having a distinct Banana flavour, surpassing in tenderness of pulp, luscious flavour, and aroma the ordinary Passion Fruit. As a climber for bowers, fences, and shade, it is also valuable, and beautiful with its immense quantity of large pink blossoms. Seed, 6d. per packet. Plants, 1/6 each; posted, 2/3.

Single Fringed Petunias.

PANSY

Bath's Selected Empress

Comprising the magnificent varieties specially selected for the Queen's gardens at Frogmore. This selection is more striking and rich in colours than any Pansies yet sent out, and more floriferous than most of the leading named fancy varieties. 1/6 and 2/6 per packet.

STRONG PLANTS available during autumn and winter, 2/6 doz. posted.

PANSY—Watters International Prize Mixed

An unsurpassed strain of Pansy. The flowers are of the largest size, most perfect shape and richest colours, which for variety and beauty cannot be excelled. The flowers are half again as large as ordinary Pansies, frequently measuring 3½ inches across. The colours are truly wonderful, and include all the new shades and markings introduced up to the present time. Those interested in Pansies should secure a packet in the full confidence that new kinds are certain to result. 1/6 and 2/6 per packet.

STRONG PLANTS available during autumn and winter, 2/6 doz. posted.

Improved Mammoth Parisian Pansies

Unrivalled for Size and Brilliant Colours.

These are a wonderful improvement on the older type of Parisian Pansy. The flowers are of extraordinary size, and are borne on strong stems well above the foliage; they are nearly all five-blotched, and contain rich combinations of colouring, including some new tints and blendings not met with in other Pansies. The plants are vigorous and large, and flower abundantly. For planting out in beds or in masses these Pansies cannot be surpassed. 6d. per packet.

PANSIES *Watters International Prize*
Choicest, Richest and Largest Blooms
1/6 and 2/6 per packet

POPPY

ORIENTAL HYBRIDS—Finest Mixed.

Great flowers of gorgeous brilliancy. For brightness of colour nothing can eclipse these beautiful Oriental Poppies. The colours range from soft flesh and rose to most brilliant dazzling scarlet and richest maroon purple. The flowers are enormous, 6 inches in diameter; hardy perennial. 6d. per packet.

Empress Pansy.

Tree Lupin.

Tree Lupin

(Hybrids Mixed).

These hybrids comprise many beautiful colours hitherto unknown in the Tree Lupin; the colours include many beautiful shades of pink and lavender. Every gardener should cultivate these Lupins, as, besides forming a very beautiful shrub, they are invaluable for cutting, the flowers being very sweet-scented, and lasting a long time in water. 6d. per packet.

Giant Machet Mignonette

"ORANGE QUEEN."

This new variety is of the same habit as the ordinary Machet, but is distinct in colour. It is one of the grandest Mignonettes ever introduced, remarkable for colour, size, fragrance and profusion of bloom. The flower spikes are immense, measuring 6 to 8 inches long, of a bright orange colour, and very showy. The perfume is delightful and powerful. Perfect as a cut flower. 1/- per packet.

Primula Malacoides

This variety is now extensively grown for winter blooming. The small lavender-pink flowers are borne in great profusion throughout the winter and early spring. It makes a fine display for bedding at a time when there is little else in bloom. 6d. per packet.

STAR PHLOX

Large Flowering Mixed, New Colours and Markings.

A greatly improved and large flowering strain of the popular Star Phlox, containing many new colours and markings. The curious star-shaped flowers, which are produced in bunches, are of every conceivable shade and marking; in fact, it is very rare that two plants are alike in colour. Most of the flowers are beautifully margined and splashed, which greatly adds to their beauty. The plants grow about a foot high, and make a glorious display through the spring and summer months. 6d. per packet.

Our Choice Collections of FLOWER SEEDS
Unequalled for Value

Double Phlox Drummondii

Mixed Colours.

These are similar in habit to the single-flowering Phlox Drummondii, but produce clusters of double and semi-double flowers in great profusion. This mixture contains several new varieties and a good mixture of colours. 6d. per packet.

Phlox—Improved Large Flowering

Grandiflora Finest Mixed.

The best of all bedding plants. This splendid strain of annual Phlox is unequalled for brightness and beauty. These Phloxes grow about a foot high, and are of neat growth. They are quite hardy, and come into bloom quickly from seed. The flowers are of great substance, beautiful form, and large size. The colours are exceedingly rich and varied, bright crimson, dazzling scarlet, deep rose, pink, pale blush, maroon, purple, white, and a great many other shades, many of them with contrasting eyes, stripes. 6d. per packet (extra large packet, for massing purposes, 2/6).

Giant Scarlet Bedding Phlox

"PHLOX GRANDIFLORA STELLATA SPLENDENS."

This is absolutely the finest of all bedding Phloxes. The plants produce a mass of dazzling scarlet flowers of extra large size; each individual floret shows a large white eye that greatly adds to the effectiveness of the display. The bushy habit of the plant makes it suitable either for bedding or clumps. 1/- per packet.

Large-flowering Phlox.

Perennial Phlox

Large-Flowering Hybrids.

Noble-flowering plants for permanent beds in the garden and herbaceous border. This strain of seed will produce plants bearing immense panicles of large and bright-coloured flowers, among which some new and beautiful colours, shades and combinations are likely to be found. The plants are perfectly hardy, 2 to 3 feet high, growing and flowering with increasing luxuriance year after year, and remaining in bloom during the late summer months. 6d. per packet.

Giant Shirley Poppies

White, Salmon, Rose and Carmine Shades—A Charming Strain for Cutting.

This mixture has been especially selected, and none but the richest, most brilliant, as well as the daintiest and loveliest, shades and colours are included. This new strain contains many new colours and shades, including blush salmon, coral pink, rose, and white. Price, 6d. per packet.

New Hybrid Iceland Poppies

Mixed Colours.

Although a hardy perennial, the Iceland Poppy blooms well the first season from seed. This strain contains many new colours and shades, the fragrant and elegant, crushed satin-like flowers are produced in great profusion during the spring and early summer. For perennial borders

these Iceland Poppies are unrivalled. They are most beautiful and graceful, the flowers being borne on tall wire-like stems well above a crown of fern-like foliage. 6d. per packet.

New Hybrid Iceland Poppy.

Perennial Phlox—New Hybrids.

Beautiful Blue Scabious

"AZURE FAIRY."

This magnificent Scabious bears an abundance of perfectly double, long-stemmed flowers that come uniformly of a lovely sky-blue colour. The outer petals are particularly broad, and the flowers are larger than any other variety. Most attractive in the garden, and there are but few flowers so useful for cutting. Flowers in a few weeks from seed. 1/- per packet.

Miniature Sunflower

"SUNLIGHT"—THE BEST CACTUS SORT.

The petals are beautifully twisted, like a fine form of single Cactus Dahlia. The colour is a beautiful canary yellow, and the flower, being borne on long stems, cannot be excelled for cutting purposes. 6d. per pkt.

Flower
Garden
Calendar
See Page 26

Salpiglossis---Grandiflora

Giant-flowering Emperor, Mixed Colours.

Very beautiful half-hardy annuals of great diversity in colour, beautifully pencilled in rich tints of yellow, purple, and brownish red. They are exceedingly free-flowering, and splendid for cutting. Sow the seed in spring, and the plants will bloom right through the summer. 6d. per packet.

Blue Butterfly Viola

"VIOLA PAPILIO."

For winter and spring bedding, Violas have become extremely popular. Of the many fine sorts in cultivation, the Blue Butterfly is easily the best. It is very free flowering and unsurpassed for bedding purposes. The plant is neat, compact, hardier, and flowers for a longer period than other sorts. It is useful for ribbon borders, where it makes a fine display. Lovely lilac colour, with dark eye. Flower of peculiarly graceful shape, lightly poised on the stem. Planted in a light, rich soil and a moist situation, it does best. 1/- per packet.

STOCK—Giant Perfection

Finest Mixed, including New Colours.

This strain of beautiful Stocks has been selected with special care for many years, and we offer it as absolutely the finest collection of Giant-flowering Stocks obtainable. The plants grow to a height of about 2 feet, and produce about 80 per cent. of large double flowers, while the range of colour embraces almost every shade imaginable. Plants may be had in bloom almost the whole year by making successional sowings. 6d. and 1/- per packet.

Mammoth Ten Week Stock

In Separate Colours.

SCARLET, PINK, VIOLET, WHITE.

Plants of this new strain are of dwarf growth and produce an extraordinary profusion of bloom. Instead of the central flowering spikes pushing upward, they divide into 12 to 15 sturdy branches, each of these producing quite a number of side shoots, which are well covered with trusses of mammoth double flowers. Excellent for bedding. We have the above four varieties separate. Each, 1/- per packet.

Stock—Giant Peach Blossom

Giant Peach Blossom is a remarkable and valuable type of the Giant Early-flowering Stocks. It develops its very large, bright pink flowers quite as early as the old sorts, and remains longer in bloom. 6d. per packet.

Early Flowering Beauty Stocks

ALL COLOURS—MIXED.

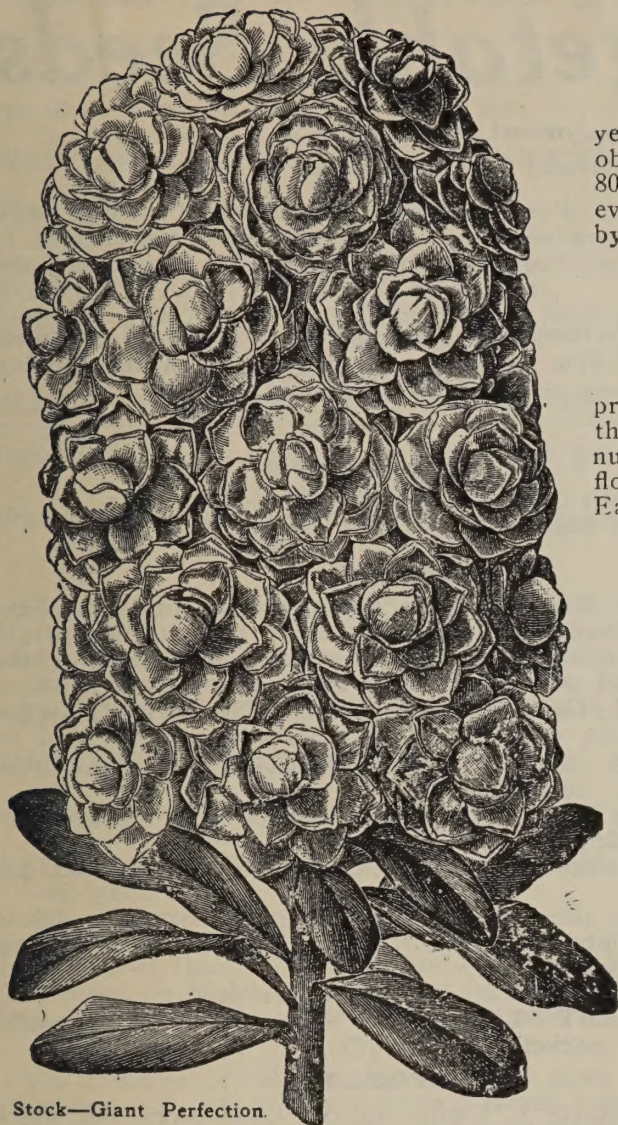

This beautiful strain originated around Nice in southern France. The plants are strong and robust, often producing 6 to 8 fully developed flower-stalks. They grow about 36 inches high, and are grown for summer and winter blooming. This strain will produce a high percentage of double flowers. 1/- per packet.

Verbena—Mammoth Auricula Flowered

This Mammoth Verbena produces magnificent trusses of bloom in a rich display of colours and shades. 6d. per packet.

Zinnia GRANDIFLORA PLENISSIMA SUPERB MIXED.

In this effective and improved selection the perfectly formed double flowers are of immense size and substance. The colours are most intense, and comprise new rich shades, and are not to be surpassed. 6d. packet.

Stock—Giant Perfection.

Giant Cactus Flowered Zinnia

Rich Variety of Colours.

A remarkable and beautiful new type of Zinnias. The blooms are fluted and formed similar to a Cactus Dahlia. The flowers are always of the largest size, measuring 4 to 6 inches in diameter. The blooms come in many bright colours—pink, light and dark, and are tipped rich mahogany brown on the end of each petal. One of the best of recent introductions. 1/- per packet.

Mixed Giant Spencer Sweet Peas

Including New Hybrids.

Composed exclusively of Giant Waved Spencer varieties, including several new hybrids of exquisite colours and shades. 6d. and 1/- per packet.

Winter Flowering Sweet Peas

Spencer Varieties, Finest Mixed.

The mixture we offer contains all the colours common to Sweet Peas, while the blooms rival the well-known Spencer varieties for size and form. 6d. and 1/- per packet.

Special Collection of New Spencer Sweet Peas

This collection contains Six of the pick of the newer varieties of Spencer Sweet Peas in distinct colours. Price, 2/-, post free.

Illuminator—Warm salmon orange overlaid with rich bright cerise pink.

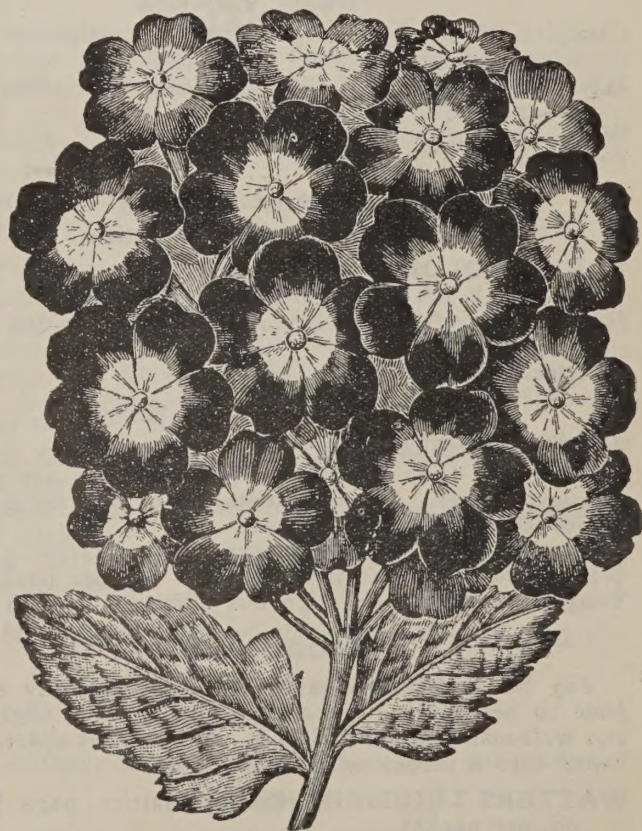

King White—Very large-flowered white.

Scarlet Emperor—Large, rich scarlet.

Royal Purple—Fine purple, distinct.

Hercules—Pale rosy pink, of great size and substance.

Jean Ireland—Creamy buff, edged carmine rose.

Mammoth Verbena

General List of Vegetable Seeds

Our Prices in the following List include Prepayment of Postage by us on all Seeds ordered by the **PACKET** or **OUNCE**

THE prices quoted in this List are for quantities usually required, but to those who grow Vegetables on a large scale it is our usual practice, whether requested to do so or not, to charge reduced rates when any one kind of seed is ordered by the $\frac{1}{4}$ lb., $\frac{1}{2}$ lb., or pound. A reduction is also made for Beans, Peas, and other seeds, when ordered by the half-bushel or bushel.

Liberal Discount On all orders for SEEDS IN PACKETS (collections and special offers excepted) the purchaser may select One Shilling's worth extra for each Five Shillings sent us. Thus, anyone sending us 5/- can select Seeds in Packets amounting to 6/-; for 10/-, Seeds in Packets to the value of 12/-; and so on.

Asparagus

Sow from August to October in rows; transplant to the permanent beds in May or June of the following year. The roots should be a foot apart, 2 feet between the rows, and buried 4 inches deep. One ounce of seed will sow 12 square feet.

Early Giant Argenteuil.—The earliest, largest, and best Asparagus now in cultivation. 6d. per packet.

Artichoke, Globe or French

Succeeds best in a good, open sandy rich loam, well trenched and well manured. Tubers of the Jerusalem Artichoke should be planted out in September or October, in rows 3 feet apart, and with a distance of 12 inches between the tubers.

Large Green Globe.—(Seed) 6d. per packet.

Large Purple.—(Seed) 6d. per packet.

Jerusalem Artichoke.—(Roots) 6d. per pound

French or Kidney Beans

Postage Extra, except in Packets.

On account of its susceptibility to frosts, this variety of Bean should not be sown until all danger of frost is past, say, about middle of September. The seed is sown in rows 2 feet apart, and from 6 to 8 inches between each plant.

Dwarf Varieties

Canadian Wonder.—The best variety in cultivation for general crop. 6d. per packet.

DWARF WHITE CLUSTER.—(See Specialties, page 1.) 1/- per packet.

White Haricot.—6d. per packet.

Pale Dun.—An early variety. 6d. per packet.

Butter Beans

Dwarf Golden Varieties

EARLY GOLDEN BRITTLE WAX. (See Specialties, page 1.) A fine golden stringless variety. 1/- pkt.

IMPROVED GOLDEN WAX.—A fine golden stringless variety. 6d. pkt.

Startler.—A good bearer. 6d. per packet.

Tall or Running Beans

WHITE CLUSTER.—1/- packet.

EPICURE.—(See Specialties, page 1.) 6d. per packet.

Scarlet Runner.—An ornamental sort. 6d. per packet.

White Dutch.—6d. per packet.

Asparagus Yard Long.—6d. per packet.

White Czar.—An excellent variety. 6d. per packet.

Tongan Stringless.—A vigorous climber. 6d. per packet.

Broad Beans

May be sown in Autumn, but are generally sown from June to September. Succeed best in a rich, slightly humid, and well-manured soil. Sow in rows $2\frac{1}{2}$ feet apart, the plants being 4 to 5 inches apart in the row.

WATTERS TRIUMPH.—(See Specialties, page 1.) 1/- lb. 6d. per packet.

Leviathan Long Pod.—A splendid variety. 1/- lb.; 6d. per packet.

Broad Windsor.—1/- lb.; 6d. per packet.

Lima Beans

Burpee's Bush Lima.—2/- lb.; 6d. per packet.

Henderson's Bush Lima.—2/- lb.; 6d. per packet.

Beet

Sow from March to July. For principal crops, from September to December. The seed should be sown in drills 18 inches apart, and after several successional thinnings the plants should stand from 6 to 8 inches apart in the rows.

WATTERS IMPROVED BLOOD-RED TURNIP.—(See Specialties, page 2.) 6d. per packet.

WATTERS SELECT BLOOD-RED.—(See Specialties, page 2.) 6d. per packet.

Dell's Black Leaf.—A very fine variety. 6d. per packet.

Covent Garden Red.—6d. per packet.

Nutting's Selected Red.—A fine dark red variety. 6d. per packet.

Eclipse.—An extremely early round Beet. 6d. per packet.

Crimson Globe.—An improved turnip-rooted variety. 6d. per packet.

Silver Beet.—A distinct sort. 6d. per packet.

SILVER BEET "LUCULLUS."—(See Specialties, page 2.) 6d. per packet.

Broccoli

This vegetable is similar to the Cauliflower, but much harder, and well adapted for cold localities.

MAMMOTH.—(See Specialties, page 1.) 6d. per packet.

Roscoff.—A very early variety. 6d. per packet.

Perfection.—One of the best. 6d. per packet.

Early White.—6d. per packet.

Borecole or Kale

Culture.—This is a delicious Winter Vegetable, requiring the same kind of culture as Cabbage.

Dwarf Green Curled.—6d. per packet.

Tall Green Curled.—6d. per packet.

Brussels Sprouts

For Culture, see Cabbage.

COVENT GARDEN.—(See Specialties, page 1.) 6d. per packet.

Aigburth.—A good sort. 6d. per packet.

President Carnot.—6d. per packet.

Cabbage

Succeeds best on a firm, stiff, rich soil. Seed should be sown in beds, and the young plants planted out at a distance of from 18 to 24 inches apart, depending on the variety. The principal sowings are made from July to August, to come in for early use; and from November to January, for main crop

Early Varieties

WATTERS EARLIEST OF ALL.—(See Specialties, page 3.) 6d. per packet.

COPENHAGEN MARKET. (See Specialties, page 3.) 6d. per packet.

Early York.—6d. per packet.

Early Wakefield.—6d. per packet.

Enfield Market.—A well-known and popular sort. 6d. pkt.

WATTERS EXPRESS.—(See Specialties, page 3.) 6d. per packet.

GENERAL LIST OF VEGETABLE SEEDS—Continued

CABBAGE—continued.

Maincrop Varieties

All-Head Early.—This is one of the best of the early flat-headed varieties. 6d. per packet.

WATTERS SUREHEAD.—(See Specialties, page 3.) 6d. per packet.

WATTERS PERFECTION.—(See Specialties, page 3.) 6d. per packet.

Succession.—A splendid variety. 6d. per packet.

GIANT OF AUVERGNE.—6d. per packet.

Large St. John's Day.—A valuable variety, largely grown by market gardeners. 6d. per packet.

Savoy Cabbage

WATTERS SELECTED DRUMHEAD.—(See Specialties, page 2.) 6d. per packet.

Improved Dwarf.—A fine dwarf variety. 6d. per packet.

Red Cabbage

Watters Giant Red Drumhead.—Very fine, grows to a large size. 6d. per packet.

Carrot

Sow from August to March; September and the two following months are the best time for general crops. Sow the seed in rows 2 feet apart; make several successional thinnings until the young plants stand from 5 to 7 inches apart, according to the size of the variety. Before sowing the soil should be deeply pulverised.

WATTERS PERFECTION.—(See Specialties, page 4.) 6d. per packet.

WATTERS CHAMPION SCARLET HORN.—(See Specialties, page 4.) 6d. per packet.

OXHEART, or GUERANDE.—(See Specialties, page 5.) 6d. per packet.

Scarlet Intermediate.—An excellent sort. 6d. per packet.

Early Nantes.—6d. per packet.

Early Scarlet Horn.—A fine half-long variety. 6d. per packet.

Chantenay, or Model.—An excellent variety. 6d. per packet.

Improved St. Valery.—(See Specialties, page 4.) 6d. per packet.

Cress

The common or Garden Cress may be sown every fortnight throughout the year, in drills 3 inches apart, choosing a shady place in Summer; the seed must be sown thickly, and just covered.

Extra Fine Curled.—Best for general purposes. 6d. per pkt.

Water Cress.—6d. per packet.

Cauliflower

(For Culture, see Cabbage.)

WATTERS HARDY.—(See Specialties, page 5.) 6d. per packet.

Watters Mammoth.—A hardy variety. 6d. per packet.

Early London.—A well-known early variety. 6d. per pkt.

Autumn Giant.—One of the best Autumn varieties grown. 6d. per packet.

Eclipse.—A valuable sort. 6d. per packet.

SNOWBALL.—(See Specialties, page 5.) 6d. per packet.

WATTERS IMPROVED ALL SEASONS.—(See Specialties, page 5.) 1/- per packet.

Sweet Corn

Postage Extra, except in Packets.

Plant the seeds in drills, 3 feet apart. Sow from the middle of September to December.

GOLDEN BANTAM.—(See Specialties, page 4.) 2/- lb.; 6d. per packet.

Crosby's Early.—Excellent. 6d. per packet.

COUNTRY GENTLEMAN.—(See Specialties, page 4.) 2/- lb.; 6d. per packet.

Celery

Sow the seed from September to the end of November. When the young plants are about 6 inches high, transplant them into beds that have been well trenched and manured; 12 inches apart is the proper distance between the plants. Water must be freely given during growth, until they attain to the height of about 12 inches, when earthing up should commence.

WHITE PLUME.—(See Specialties, page 5.) 6d. per packet.

GIANT PASCHAL.—(See Specialties, page 5.) 6d. per packet.

Improved Solid White.—One of the best sorts. 6d. per pkt.

Red Celery Seed.—For medicinal purposes. 4/- per lb.; per post, 4/9.

Cucumber

Sow, after all danger of frost is past, in rich, well-manured soil, leaving 6 inches of space between each plant. When plants begin to grow, mulch the ground well with straw, thus keeping the earth moist. Attention must be given in season to the stopping of vines, thinning of fruit, etc.

TELEGRAPH.—(See Specialties, page 5.) 1/- per packet.

Long Green Prickly.—Very hardy. 6d. per packet.

White Perfection.—A distinct and valuable variety. 6d. per packet.

Serpent, or Snake.—6d. per packet.

JAPANESE CLIMBING.—(See Specialties, page 5.) 6d. per packet.

Thorburn's Everbearing.—6d. per packet.

Short Green, or Gherkin.—6d. per packet.

West India Gherkin.—6d. per packet.

Egg Plant

Culture.—Sow the seed in good, rich soil, on a warm border, either in September or October. When the young plants are large enough, transplant them in rows 2 feet apart.

Long Purple, New York Giant, Long White.—Each 6d. per packet.

Endive

Culture.—Used as a substitute for Lettuce during Winter. Make the first sowing in February, in good, rich soil. When the plants are large enough to handle, transplant them in rows from 12 to 18 inches apart.

Green Curled, Batavian.—Each 6d. per packet.

Herbs

Culture.—Sow from August until November, in rows 15 inches apart; thin out the plants to a distance according to the size attained by the different varieties; water well in dry weather.

Anise, Balm, Basil, Caraway, Horehound, Lavender, Marjoram, Rosemary, Sage, Savory, Thyme.—Each 6d. per packet.

Kohl Rabi

A bulbous formed vegetable somewhat resembling a field Turnip; when cooked before being fully grown is delicious and tender, combining the flavours of Cabbage and Turnip.

Large White or Green.—Greenish white skin. 6d. per packet.

Large Purple.—Purple skin. 6d. per packet.

Leek

Culture.—Sow the seed from May to October, in drills 9 inches apart. Good soil is necessary to grow Leeks to perfection.

MONSTROUS CARENTAN.—(See Specialties, page 4.) 6d. per packet.

London Flag.—A standard sort. 6d. per packet.

The Lyon.—A large exhibition variety. 6d. per packet.

Lettuce

Culture.—The seed may either be sown in drills, where the plants are to remain, or in beds, and transplanted into rows. If sown in drills, they will require to be thinned out to a distance from 9 to 12 inches apart. The seed may be sown from August to October for main crops, and throughout the year for a succession.

WATTERS GREAT HEART.—(See Specialties, page 6.) 6d. per packet.

WATTERS MODEL SUMMER.—(See Specialties, page 6.) 6d. per packet.

WATTERS SUMMER MARKET.—(See Specialties, page 6.) 6d. per packet.

Brittle Ice.—6d. per packet.

Improved Neapolitan.—One of the best Lettuces. 6d. per packet.

Iceberg.—A very good variety. 6d. per packet.

Drumhead.—6d. per packet.

Wonderful.—6d. per packet.

New York.—Heads large, of good quality. 6d. per packet.

Mustard

Sow at intervals along with and in the same manner as the Cress.

White.—Used for pickling and for salads. 6d. per packet.

Melon, Rock or Musk

Culture.—Melons require a good, rich soil to grow them to perfection. Sow the seeds in hills 6 feet apart each way. Mix thoroughly with the soil in each hill a couple of shovelfuls of well-rotted manure. The plants should be, if possible, established in the hills in October or November.

EMERALD GEM.—(See Specialties, page 6.) 6d. packet. Extra Early Hackensack.—6d. per packet.

Nutmeg.—So named on account of its shape. 6d. per packet.

MILLER'S CREAM.—(See Specialties, page 6.) 6d. packet. Rocky Ford.—6d. per packet.

Jenny Lind.—A small but excellent sort. 6d. per packet.

Long Island Beauty.—6d. per packet.

Delmonico.—6d. per packet.

Melon, Water

PAUL'S BONNY BEST.—(See Specialties, page 6.) 6d. per packet.

Florida Favourite.—A very popular variety. 6d. per packet.

Delaware.—6d. per packet.

Kleckley Sweets.—6d. per packet.

McIvor Sugar Melon.—6d. per packet.

Black Spanish.—Almost round in shape. Best for general use. 6d. per packet.

Dixie.—A very prolific bearer. 6d. per packet.

Cole's Early.—6d. per packet.

Cuban Queen.—A large variety. 6d. per packet.

Early Russian.—A very early variety. 6d. per packet.

The Boss.—Oblong in shape; dark green skin. 6d. per pkt.

Kolb's Gem.—6d. per packet.

Rodosto.—An exceedingly early variety. 6d. per packet.

Melon, Preserving

Colorado Preserving.—This variety is what is commonly called the "Pie Melon." 6d. per packet.

Citron.—Sometimes called "Sugar Melon." Excellent for preserves. 6d. per packet.

Onions

Culture.—Sow the seed from the end of March till the end of November, in drills one foot apart. When the young plants are 3 or 4 inches high, they must be thinned out to a distance of from 5 to 9 inches apart, according to the size of the variety planted.

WATTERS SELECTED BROWN SPANISH.—(See Specialties, page 7.) 6d. per packet.

Extra Early Brown Spanish.—6d. per packet.

EXTRA EARLY GOLDEN GLOBE.—(See Specialties, page 7.) 6d. per packet.

Brown Globe.—A good keeping variety. 6d. per packet.

Giant Rocca.—6d. per packet.

MAMMOTH SILVER KING.—(See Specialties, page 7.) 6d. per packet.

EARLY WHITE QUEEN.—(See Specialties, page 7.) 6d. per packet.

WHITE LISBON.—(See Specialties, page 7.) 6d. per pkt.

Silver Skin.—Fine for pickling. 6d. per packet.

Parsley

Sow in September and October, and again in April. Cut often, and do not allow the plant to seed.

Extra Fine Curled.—The most popular variety. 6d. per pkt.

Parsnip

Sow the seed in shallow drills, about 18 inches apart. When the young plants are 2 or 3 inches high, thin out to about 3 or 4 inches apart; after this, when the plants have grown about 8 inches high, it is best to thin out again, this time taking out those that show any sign of weakness, finally leaving the plants 8 inches apart.

WATTERS IMPROVED HOLLOW CROWN.—(See Specialties, page 7.) 6d. per packet.

Student, Maltese, Guernsey.—Each 6d. per packet.

Seed Potatoes

All Varieties Stocked in Season. Prices per cwt. or ton on application.

Plant from July to October and for Autumn crop in January and February.

Peas

(Postage Extra, except in Packets.)

Culture.—To succeed well, and grow to perfection, the ground, previous to the seed being sown, should be deeply trenched and well manured. Sow the seed in drills from half to 1 inch deep, and from 2 to 4 feet apart between the rows, according to the size and habit of the varieties planted. The seed should be sown, say, from 3 to 6 inches apart, the former distance for the dwarf, and the latter for the taller sorts.

EARLIEST VARIETIES.

WATTERS EARLY MARROW.—(See Specialties, page 8.) 1/6 lb.; 6d. per packet.

WATTERS EARLY DWARF CHAMPION.—(See Specialties, page 8.) 1/6 lb.; 6d. per packet.

English Wonder.—A fine variety. 1/6 lb.; 6d. per packet.

Dwarf Defiance.—1/6 lb.; 6d. per packet.

Day's Early Sunrise.—Height, 3ft. 1/- lb.; 6d. per packet.

AMERICAN WONDER.—(See Specialties, page 7.) 1/6 lb.; 6d. per packet.

Chelsea Gem.—1/6 lb.; 6d. per packet.

Little Gem.—A very fine dwarf Pea. 1/6 lb.; 6d. per packet.

Wm. Hurst.—Height, 1½ ft. One of the best. 1/6 lb.; 6d. pkt.

The Sherwood.—Height, 1 ft. An early variety. 1/6 lb.; 6d. per packet.

SECOND AND MAIN CROP VARIETIES.

DAISY.—(See Specialties, page 8.) 1/6 lb.; 6d. per packet.

Stratagem.—A first-class wrinkled Pea. 1/6 lb.; 6d. per pkt.

Yorkshire Hero.—Still the leading main crop variety. 1/- lb.; 6d. per packet.

Sharpe's Queen.—1/6 lb.; 6d. per packet.

Pride of the Market.—1/6 lb.; 6d. per packet.

Improved Sugar or Edible Podded.—The pods have no membrane inside lining; they are gathered young, and boiled whole, like French Beans. 6d. per packet.

Mammoth Prolific Sugar.—6d. per packet.

EARLIEST SUGAR.—(See Specialties, page 8.) 6d. pkt.

Pumpkin

Sow the seed from September to December, in good, rich soil. Form hills about 6 feet apart each way. Sow about 7 seeds in each hill. When the young plants are well above the ground, thin out those that show any signs of weakness, finally leaving 2 or 3 plants on each hill.

GLOBE MAMMOTH.—(See Specialties, page 9.) 6d. pkt.

Cashaw, or Crookneck.—6d. per packet.

Ironbark.—A very large and popular variety. 6d. packet.

Turk's Cap.—One of the best for table use. 6d. per packet.

Jonathan (Trombone).—6d. per packet.

Crown.—A prolific variety, and splendid keeper. 6d. packet.

Japanese.—6d. per packet.

Connecticut Field.—Very productive. 6d. per packet.

Large Tours, or Mammoth.—The largest of all. 6d. per pkt

Rhubarb

Culture.—A deep, rich soil is necessary for the successful cultivation of Rhubarb. Sow the drills, either in August or September, 18 inches apart. When the young plants are 2 inches high, thin them out to a distance of 18 inches between each plant.

Topp's Winter.—A splendid variety. 6d. per packet.

Champagne.—A medium-sized variety. 6d. per packet.

Myatt's Victoria, Giant.—Each 6d. per packet.

Early Raspberry.—6d. per packet.

Squash

Culture.—Same as Pumpkin.

Mammoth Whale.—An extra large fruited sort. 6d. per pkt.

Hubbard.—6d. per packet.

Yellow Custard (Bush).—6d. per packet.

WHITE CUSTARD (Bush).—(See Specialties, page 10.) 6d. per packet.

Spinach

Culture.—Sow the seed thinly in drills 18 inches apart; the plants ought to be thinned out to 8 or 9 inches distance from each other in the rows.

Prickly, or Winter.—6d. per packet.

Round, or Summer.—6d. per packet.

New Zealand.—Rapid grower. 6d. per packet.

GENERAL LIST OF VEGETABLE SEEDS—Continued

Radish

Culture.—The seed may be sown throughout the year. For a succession, sow every fortnight in drills 8 to 12 inches apart.

Round, or Turnip-shaped Varieties

Round Black Spanish.—A Winter variety. 6d. per packet.
Giant Crimson Forcing.—6d. per packet.
Red Turnip, White Turnip, Mixed Turnip.—6d. per packet.

Oval-Shaped Varieties

French Breakfast.—Scarlet, with white tip. 6d. per packet.
Olive-Shaped White.—6d. per packet.

Long Radishes

CHARTIER.—(See Specialties, page 9.) 6d. per packet.
Long Scarlet Short Top.—6d. per packet.
ICICLE.—(See Specialties, page 9.) 6d. per packet.
Chinese Rose Winter (Scarlet China).—6d. per packet.
California Mammoth White Winter.—6d. per packet.

Salsify

Mammoth Sandwich Island.—6d. per packet.

Tomato

Culture.—To get Tomato plants early, sow the seed about the middle of July, under glass, upon a hot bed. When sufficiently strong they can be gradually hardened off in a cold frame, and finally in a sheltered situation, preparatory to their being planted in good, rich soil.

AMERICAN CORELESS.—(See Specialties, page 10.) 1/6 per packet.

ALACRITY.—(See Specialties, page 10.) 1/- per packet.

WATTERS CRIMSON BELLE.—(See Specialties, page 10.) 6d. per packet.

MATCHLESS.—(See Specialties, page 10.) 1/- packet.

Wilding's Prolific.—One of the best for general use. 6d. pkt.

Watters Earliest.—One of the best early varieties. 6d. pkt.

WATTERS MAINCROP.—(See Specialties, page 10.) 6d. per packet.

Burwood Prize.—A very popular variety. 6d. per packet.

Trophy.—A well-known, popular, old variety. 6d. per packet.

Atlantic Prize.—One of the earliest varieties. 6d. per packet.

Large Red.—6d. per packet.

Earliana, Queen of England, Marvel, Mikado, Pear-Shaped, Belle of Massy, June Pink, Peach, Golden Queen.—Each 6d. per packet.

Turnip

Culture.—Sow the seed from the end of August until the middle of May. The seed may either be sown broadcast or in drills, the latter way being the best. The drills should be about 18 inches apart. When the young plants are an inch or two in height, they should be thinned.

EARLY WHITE MILAN.—(See Specialties, page 9.) 6d. per packet.

Jersey Lily.—A very popular sort. 6d. per packet.

Snowball.—Very early Winter variety. 6d. per packet.

Early Purple Top Milan.—6d. per packet.

Non-Seeding White.—6d. per packet.

Silver Ball.—A splendid variety. 6d. per packet.

White Stone.—Well-known white variety. 6d. per packet.

Golden Ball.—Deep yellow colour, and of the finest quality. 6d. per packet.

MONT BLANC.—(See Specialties, page 9.) 6d. per packet.

GARDEN SWEDE.—(See Specialties, page 9.) 6d. packet.

Vegetable Marrow

Culture.—Same as Pumpkin.

Long White Bush.—6d. per packet.

Improved Long White.—The best long white variety. 6d. per packet.

FIRST OF ALL.—(See Specialties, page 10.) 6d. packet.

Long Green.—Green-striped skin, bush variety. 6d. per pkt.

Miscellaneous Seeds, Roots, Etc.

Cape Gooseberry.—6d. per packet.

Capsicum, Long Red, Golden Dawn, Ruby King.—Each 6d. per packet.

Mushroom Spawn.—In bricks. 1/6 each.

Miscellaneous Seeds, Roots, etc.—(Continued.)

Potato Onions.—1/- per lb.

Tree Onions.—1/6 per lb.

Garlic and Shallots.—Each 1/- per lb.

Haricot Beans and Boiling Peas for Cooking.—Prices on application.

Strawberry Seed.—St. Joseph. 6d. per packet.

” ” St. Antoine de Padoue. 6d. per packet
(Postage Extra on Mushroom Spawn, Potato and Tree Onions, etc.)

Root Crops

Write for our Pamphlet on Root Crops. Post Free.

Turnips and Swedes

Yellow Aberdeen Purple Top Turnip.—A superior variety, exceedingly hardy, of large size and fine quality. 2/6 lb.

Orange Jelly Turnip.—An excellent quick-growing variety. 3/- per lb.

White Globe Turnip.—One of the best for earliest use. 3/- lb.

Swede, Monarch, or Elephant Purple Top.—This tankard-shaped variety has become so popular that it has been adopted by all the leading growers, 2/6 lb.

Swede, Champion Purple Top.—One of the finest stocks in cultivation, of good shape, and very clean growing. 2/6 per lb.

Cattle Carrot

Sinclair's Champion or Yellow Intermediate.—Has become a great favourite among dairy farmers and others. Exceedingly nutritious and heavier cropper than Scarlet Intermediate. Colour yellow, slightly green at top. Enormous yielder; good keeper. 5/- per lb.

Giant White Belgian.—Grows to a very large size, and produces a heavy crop. Suitable for all soils. 5/- per lb.

Intermediate Scarlet.—Suitable for shallow soils. 5/- per lb.

Long Scarlet Altringham.—An extra fine sort. The roots grow to a large size, and are of excellent quality. 5/- lb.

Sugar Beet

Danish Improved Sugar.—A distinct strain from Denmark. Roots grow to a large size, and are of heavy weight. 2/6 per lb.

Red-Top White.—Good cropping variety. 2/6 per lb.

Vilmorin's Improved.—Best variety for dairy purposes, being exceedingly rich in sugar and firm in flesh. 2/6 per lb.

Mangels

Improved Giant Half-Sugar.—A heavy yielder. One of the very best Mangels in cultivation. 2/6 per lb.

Champion Yellow Globe.—The finest stock of Yellow Globe Mangel. 2/- per lb.

Mammoth, or Giant Long Red.—This variety is far superior to the ordinary stock, being remarkable for its enormous size and clean shape. 2/- per lb.

Gate Post, or Giant Yellow Intermediate.—A yellow-fleshed variety of unequalled feeding properties. 2/- per lb.

Dwarf Essex Rape

Best and Most Fattening Sheep Forage Known.

Rape can be sown either in autumn or spring, at the rate of six pounds to the acre. Under favourable conditions, it is ready for pasturing sheep or cattle in about two months. Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of Rape excels all other plants we know of. To secure the best results, it should be sown in drills. As there are several varieties of Rape, some very much better and yielding larger crops than others, and also as many of the cheaper samples are tainted with wild turnip or yellow-weed, we would strongly advise growers to buy their seeds from a reliable source. The seed we offer has been specially grown and selected for seed purposes, and will yield much heavier crops of fodder than much of the seed offered as Sowing Rape. 9d. per lb. Price per cwt. on application.

WHITE MUSTARD—Valuable for mixing with Rape. 1/6 lb.

COW PEA—A splendid summer Fodder Plant. Should be sown late in spring. Price on application.

MELILOT (*Melilotus parviflora*)—An annual closely allied to Bokhara Clover. It is highly nutritious, a rapid grower, and enriches the soil with nitrogen. 6d. lb.

SHEEP'S BURNET—This is a most valuable Fodder Plant. 1/- lb.

KIDNEY VETCH, or YELLOW SAND CLOVER—It is exceedingly valuable for dry sands and poor soils, where nothing else will thrive. 2/6 lb.

SILVER BEET—The giant Silver Beet as a fodder plant is rapidly becoming very popular. It grows very quickly, and produces a great quantity of nutritious fodder. 4/- lb.

Sugar Beet.

SAINFOIN (ESPARSETTE)—An excellent forage plant for a dry climate. 1/6 lb.

KALE, THOUSAND HEADED—Grows from three to four feet high; it is highly recommended for sheep and lambs on account of the immense quantity of green food produced on a limited area. 2/6 lb.

REANA LUXURIANS—Resembles Indian Corn in appearance, but the leaves are much longer and broader, and the stalks are sweeter. 2/6 lb.

RYE—Valuable green fodder, usually sown with Vetches. Price on application.

TARES or VETCHES—Very nutritious, and suitable for all kinds of stock, usually sown with Barley or Rye. Price on application.

SHEEP'S PARSLEY—So called because sheep are specially fond of it. All stock will eat it readily. 2/6 lb.

SALTBUSH—The value of Saltbush as a fodder plant has been proved beyond doubt. The seed can be scattered on the surface of the soil before rain, when it will germinate readily. The plant gives abundance of seed, so that, when once established, a crop grows every year. 5/- lb.

MARROW KALE (Chou Moellier)—A large variety of Kale, with a very stout and thick, unbranched stem, which is excellent food for all kinds of stock. The leaves are very long and broad, and constitute a considerable part of the crop. 5/- lb.

Chicory

We always have a large stock of the large-rooted Magdeburg or Coffee Chicory Seed on hand, and shall be pleased to send samples and price for quantity on application.

Large-rooted Long Magdeburg or Coffee—Sown in drills, the roots become well developed. When they are dried, roasted and ground, they become the Chicory of commerce. Sow from 2 to 3 lbs. to the acre. 5/- lb.

Thousand-Headed Kale.

Chicory—Large-Rooted Magdeburg.

Sorghums and Millets

(Prices on application.)

EARLY AMBER SUGAR CANE—A valuable fodder plant. It produces from six to twelve canes from each root, and grows six or seven feet high. It is very rich in saccharine. If sown in drills three feet apart, ten pounds will sow an acre; if broadcast, fifteen pounds.

JOHNSON GRASS—A very valuable forage plant, and well adapted for dry districts. 1/6 per lb.

SORGHUM SACCHARATUM—A very nutritious summer fodder plant, excellent for cows.

BROOM CORN—The two best varieties are Long Brush Evergreen and California Golden. A splendid fodder plant, thriving well in a good, deep soil.

IMPHEE, or PLANTER'S FRIEND—This is a variety of Sorghum and requires the same treatment in cultivation.

PEARL, or EAST INDIAN MILLET—Cat-tail Millet. (*Penicillaria spicata*.) This is a valuable fodder plant. It grows six to ten feet high, and furnishes an enormous bulk of fodder. 1/6 per lb.

JAPANESE MILLET—A very valuable variety, now largely grown in Victoria. It attains a height in good soil of six to ten feet, and yields from ten to twenty tons of green fodder per acre. For feeding green it may be cut from day to day, as needed, until the seed begins to ripen. For dry fodder it should be cut in the blossom stage. Sow from October to January; 12 to 15 pounds if broadcasted; if in drills 18 inches apart, 8 to 10 pounds per acre.

GOLDEN MILLET—One of the best drought-resisting forage plants in cultivation, of which stock are very fond.

PASTURE GRASSES

The Prices of Grasses and Clovers have been appended for the guidance of our Customers as to their general value, but we cannot be bound by these rates, as under present conditions prices are subject to continual fluctuation.

Write for our Special List of Grass, Clover, and Agricultural Seeds

Some Reasons Why

Our Special Price
List of Grass and
Clover Seeds

SAVES POUNDS

IT CONTAINS ONLY VARIETIES OF GRASSES AND CLOVERS POSSESSING HIGH FEEDING VALUE, and thus prevents farmers wasting time and money on sorts that are inferior for stock feeding.

IT GIVES A FIFTY-YEAR-OLD ASSURANCE OF SEEDS THAT ARE OF THE HIGHEST QUALITY IT IS POSSIBLE TO PROCURE, and so avoids any risk of the farmer sowing poor quality seeds that are frequently offered at low prices.

ITS PRICES ARE EXTREMELY REASONABLE FOR BEST QUALITY SEEDS, thus assuring farmers of the BEST POSSIBLE VALUE for their money.

IT OFFERS THE SOUND ADVICE TO FARMERS—Do not be influenced by low prices—the lower the price, the more doubtful the quality, and farmers cannot afford to purchase SEEDS OF DOUBTFUL QUALITY.

Couch Grass—A valuable Grass for sowing on embankments 3/6 lb.

Cocksfoot or Orchard Grass (*Dactylus glomerata*)—A very valuable Grass, and more largely grown in Victoria than any other variety, with the exception of the English Rye Grass. It is an enormously productive Grass, and all kinds of stock eat it readily. Price on application.

Creeping Bent (*Agrostis stolonifera*)—A valuable Grass for sowing in moist situations. 2/6 per lb.

Crested Dogtail—One of our most useful Grasses. 2/- lb.

Chewing's Fescue—A very hardy and nutritious Grass. 2/6 lb.

Hard Fescue—A dwarf-growing Grass of great value. 2/6 lb.

Tall Fescue—2/- lb.

Hungarian Forage Grass—Very hardy. 1/6 lb.

Meadow Foxtail—2/6 per lb.

Meadow Fescue—2/- per lb.

Paspalum Dilatatum—This wonderful Fodder Grass is one of the most valuable ever introduced into Australia. 2/- lb.

Prairie Grass—One of the hardiest and most nutritious Grasses. 7/6 per bushel.

Perennial Rye Grass—Most useful in the formation of pastures, lawns, etc. Price for quantity on application.

Pacey's Short Seeded Perennial Rye Grass—Thrives on slopes and upland situations. 12/6 bushel.

Phalaris Commutata—5/- lb.

Rhodes Grass—A valuable Grass for hot climates. 2/6 lb.

Rib Grass—Specially adapted for sowing on sheep runs. 6d. per lb.

Smooth Stalked Meadow Grass (*Poa pratensis*)—Also called

Kentucky Blue Grass.—2/6 lb.

Sweet Scented Vernal—2/- per lb.

Sudan Grass.—1/- lb.

Sheep's Fescue—3/- per lb.

Teff Grass—1/6 per lb.

Italian Rye Grass—An annual; grown principally for hay. 9/6 per bushel.

Western Woads Rye Grass—Grows well on very wet land. 10/6 per bushel.

Timothy—Highly nutritious; relished by all stock. 1/- lb.

Woodmeadow Grass—3/- lb.

Wallaby Grass—2/6 lb.

Yorkshire Fog—Inferior to many sorts, but of easy culture. 9d. per lb.

Prairie Grass.

WASHINGTON MAMMOTH RED CLOVER—A vigorous and luxuriant growing variety from America, specially adapted for light gravelly soils where the ordinary Red Clover will not produce a paying crop. Write for pamphlet on this great American Clover. 2/6 per lb.

Strawberry Clover (Clean Seed)—A very valuable variety for damp land. 7/6 per lb.

Yellow Suckling Clover—A low-growing clover. 1/- per lb.

Berseem or Egyptian Clover—2/- per lb.

Cluster Clover—1/- per lb.

Bokhara Clover—2/- per lb.

Subterranean Clover—An annual spreading Clover, which sows itself down every year. 6/- per lb.

Japan Clover—2/6 per lb.

Burr Clover—1/6 per lb.

Lucerne Seed

New Seed Tested for Germination and Purity.

We make a speciality of this article. Knowing the importance to the farmer of its being free from Dodder, we in the first instance buy the finest seed, and then put it through our machines twice. Sow either in autumn or spring, eight to ten pounds per acre in drills, and fifteen pounds broadcast.

French Provence

Lucerne—2/6 per lb.

Hunter River—

Double screened. 2/6 per lb.

Hunter River—

Farmers' dressed. 2/3 per lb.

The collection of 12 packets of Flower Seeds, as above, for sowing any month of the year, sent post free for 2/6

General List of Flower Seeds

Brief Directions as to Time of Sowing, Culture, etc.

Our Collections of Choice Flower Seeds
2/6 and 5/-

Hardy Annuals may be sown in the open borders from September until November, and many sorts again in March and April for early Spring flowering; to obtain good results, the plants must be carefully thinned out, and the tall-growing varieties be tied up to neat sticks. Half-hardy Annuals should be sown in Spring in a frame, or warm border. Hardy Biennials should be sown in the open borders in March for flowering the following Summer. Half-hardy Perennials, if intended to flower the same year, may be sown in August and September. Hardy Perennials may be sown in the open ground in March and April, and transplanted in the Spring.

Abbreviations.—HA, Hardy Annual; HHA, Half-hardy Annual; H.B., Hardy Biennial; HP, Hardy Perennial; HHP, Half-hardy Perennial; G.P., Greenhouse Perennial.

Plants for Bazaars, Fetes, &c.

We make a speciality of these, and put them up in collections of saleable lines containing exceptional value at £2, £3, £5, and upwards.

ROSES Hints on their Cultivation

For garden decoration Roses are indispensable. For exhibition purposes, or where large collections are grown, beds or borders should be specially prepared apart from other flowers, as only in this way can they be grown to perfection. The soil should, if possible, be trenched a month or two previously. Work in a good quantity of cow manure, with a sprinkling of bone dust. In flower beds where this is not practicable, holes should be taken out, and the soil enriched, or replaced with new. On arrival of plants unpack carefully in the shade, and sprinkle well with water. Before exposing the roots, get the holes ready. The depth of plants in the ground when planted should be two or three inches deeper than when grown in the nursery. When planting, if the weather is at all dry, have a bucket of water handy; dip the roots of each one in it before planting. Spread the roots evenly, giving them a downward tendency. Fill in part of the soil and tread firmly. Place a stake to each plant. Water well after planting. Shorten back the top at once, as by transplanting the natural balance between root and branches is upset. For garden decoration and the production of cut flowers, for which purpose teas and hybrid teas are more especially adapted, it is unnecessary to prune severely. For large blooms it is necessary to prune fairly hard, removing all exhausted wood, and shortening back previous season's growth according to habit and vigour of plants.

PRICES:

Dwarfs and Climbers 1/6 each; 15/- per dozen, postage extra.

The 1920 "Argus" Collection of Roses

As a result of a plebiscite taken through the columns of the "Argus," the following Roses were chosen by leading Rose-growers as the twelve best varieties adapted for general garden culture. They are, undoubtedly, a splendid collection, either for decoration or show purposes:—

Belle Siebrecht
Chateau de Clos Vougeot
Frau Karl Druschki

General McArthur
Lady Hillingdon
Lyon Rose

Madame Abel Chatenay
Madame E. Herriot
Miss Marion Manifold

Mrs. H. Stevens
Red Letter Day
White Maman Cochet

The Collection of 12 varieties for 15/-, carriage extra; or 16/- post free.
 For Descriptions, see Special List.

STANDARD ROSES

We have a fine lot of these in strong, well-grown plants. Our collection comprises all the popular varieties, which are available from May until August. We would advise our Customers to order Standard Roses early, as by leaving their orders until late in the season they are liable to be disappointed in their selection of popular varieties, which, despite large stocks, have often been sold out.
 3/- each, 30/- per dozen, 16/- per half-dozen.

Write for Watters & Sons Complete List of Beautiful Roses, which also gives instructions on How to Grow Them

Most Popular Fruit Trees

In preference to giving our customers a long list of varieties to wade through, which is frequently misleading, we have selected some of the most popular varieties of Apples, Apricots, etc., and listed them together with brief descriptions. We trust this will aid beginners in making a selection. We stock practically all varieties in cultivation, and will be pleased to supply any variety not listed. (Special quotations for lots of 100 or more.)

Apples

1/6 each; 15/- per doz.

- Cleopatra.**—Above medium size, does well in Northern District, good for export.
- Devonshire Quarrendon.**—A very highly-coloured apple. Early.
